A

Acanthamoeba keratitis, animal model, sugar inhibition of ameba binding to corneal epithelium in vitro (rabbit), 1858
Accommodation
  differences between emmetropia and late-onset myopia, 1511
  lens changes during, 569
Acid phosphatase, mRNA levels in keratoconus corneas, 529
Acquired immune deficiency syndrome (AIDS). *See* HIV/AIDS
Acridine orange digital fluorography, leukocyte-endothelial interactions in retinal microcirculation, 811
Actin, α smooth muscle actin, tractional force generation by Müller cells (pig), 456
Adeno-associated virus vector, retinal gene transfer, assessment via green fluorescent protein (mice), 2857
Adenosine, pericyte relaxation (bovine), 2695
Adenosine A_2 receptor, pericyte relaxation (bovine), 2695
Adenosine monophosphate, cyclic
  in adrenomedullin-induced relaxation of central retinal arteries (dog), 56
  5-HT_{1A} receptors negatively coupled to cAMP production in cultured RPE cells, 510
Adenosine triphosphatase, Na,K-ATPase response to phorbol ester in ciliary epithelium (rabbit), 866
Adenosine triphosphate
  calcium mobilization in lens (sheep), 855
  depletion, photoreceptor mitochondrial inhibition (rat), 1569
Adenovirus infection, topical corticosteroid reversal of anti-adenoviral effect of topical cidofovir (rabbit), 253
Adenovirus vector, cellular immunity and stability of ocular adenovirus-mediated transgene expression (mice), 2224
Adenylyl cyclase, VIP signal transduction pathway in lacrimal gland, 610
Adhesion. *See* Cell adhesion; Cell adhesion molecules
Adjuvant, in induction of experimental autoimmune anterior uveitis (rat), 2171
Adoptive immunotherapy, adoptive transfer of murine CMV-immune lymph node cells to T-cell-depleted mice, CMV retinitis and, 301
Adrenoceptors
  β-adrenergic receptor sensitivity in ciliary process, circadian effects of timolol on IOP (rabbit), 1708
  calcium mobilization in lens (sheep), 855
Adrenomedullin, relaxation in central retinal arteries (dog), 56
Age/aging. *See also* Geriatric population
  age-related changes in blinks, 92
  biomechanics of anterior lens capsule, 357
  continuity of lipid membranes in lens fiber cells, 2826
  hydraulic conductivity of Bruch's membrane, 762
  lenticular light scattering, wavelength and angle (depth) and, 1321
  morphometric changes in central corneal endothelia, 779
  open-angle glaucoma prevalence and incidence, 83
  peroxides and uveal norepinephrine release, 842
  reduced proliferative capacity of lens epithelial cells, caloric restriction and (mice), 100
  RPE cell density, 2016
  self-reported assessment of dry eye, 2469
  Stiles-Crawford effect and, 1271
  visual function and, 557
Aggrecan, in sclera, 1740
AL-3789, for corneal neovascularization (rabbit), 1954
Alamar blue reduction, corneal endothelial cell viability (rabbit), 1929
Albinism, stereopsis and size constancy in, 2800
Albumin, aqueous humor, outflow facility measurement and (bovine), 2165
Alcohol ingestion, smooth pursuit in twins before and after alcohol ingestion, 1768
Aldose reductase, retinal activity, glucose and (rat), 62
Aldose reductase inhibitors, retinal microangiopathies in galactose-fed rat model, 1066
Alertness, stability of ocular counterrolling and Listing's plane during static roll-tilts (monkey), 2103
Alkali injury
  corneal ulceration, synthetic metalloproteinase inhibitor action on neutrophil chemotaxis (rabbit), 1340
  synthesis of inflammatory eicosanoids in corneal epithelium (rabbit), 1963
Allergic conjunctivitis
  cytokine expression in conjunctival cells, 1350
  vernal keratoconjunctivitis. *See* Vernal keratoconjunctivitis
Allergy, ocular, epithelial keratopathy, eosinophil granule proteins in, 593
Allograft rejection
  orthotopic corneal transplantation in high-risk eyes (mice), 1130
  topical FK506 in corneal graft rejection model (rat), 901
Altitude retinopathy, 1653
Amacrine cell(s)
  neuronal coupling, 267
  nitric oxide enhancement of cholinergic amacrine cell activity (rabbit), 1634
Amblyopia, adult, Vernier acuity improvement, 1493
γ-Aminobutyric acid (GABA), in retina (vertebrate), 553
Amyloidosis, lactoferrin-related, familial subepithelial corneal amyloidosis, 2756
Angiogenesis, inhibition, tissue inhibitor of metalloproteinase-3, 817
  letter, 2433
Angiostatic drugs, for corneal neovascularization (rabbit), 1954
Angiotensin II, suppression of CO_2-induced relaxation of retinal pericytes (bovine), 652
Animal handling (*letter*), 1053
Animal model

  hydraulic conductivity of Bruch's membrane, 762
  lenticular light scattering, wavelength and angle (depth) and, 1321
  morphometric changes in central corneal endothelia, 779
  open-angle glaucoma prevalence and incidence, 83
  peroxides and uveal norepinephrine release, 842
  reduced proliferative capacity of lens epithelial cells, caloric restriction and (mice), 100
  RPE cell density, 2016
  self-reported assessment of dry eye, 2469
  Stiles-Crawford effect and, 1271
  visual function and, 557
Aggrecan, in sclera, 1740
AL-3789, for corneal neovascularization (rabbit), 1954
Alamar blue reduction, corneal endothelial cell viability (rabbit), 1929
Albinism, stereopsis and size constancy in, 2800
Albumin, aqueous humor, outflow facility measurement and (bovine), 2165
Alcohol ingestion, smooth pursuit in twins before and after alcohol ingestion, 1768
Aldose reductase, retinal activity, glucose and (rat), 62
Aldose reductase inhibitors, retinal microangiopathies in galactose-fed rat model, 1066
Alertness, stability of ocular counterrolling and Listing's plane during static roll-tilts (monkey), 2103
Alkali injury
  corneal ulceration, synthetic metalloproteinase inhibitor action on neutrophil chemotaxis (rabbit), 1340
  synthesis of inflammatory eicosanoids in corneal epithelium (rabbit), 1963
Allergic conjunctivitis
  cytokine expression in conjunctival cells, 1350
  vernal keratoconjunctivitis. *See* Vernal keratoconjunctivitis
Allergy, ocular, epithelial keratopathy, eosinophil granule proteins in, 593
Allograft rejection
  orthotopic corneal transplantation in high-risk eyes (mice), 1130
  topical FK506 in corneal graft rejection model (rat), 901
Altitude retinopathy, 1653
Amacrine cell(s)
  neuronal coupling, 267
  nitric oxide enhancement of cholinergic amacrine cell activity (rabbit), 1634
Amblyopia, adult, Vernier acuity improvement, 1493
γ-Aminobutyric acid (GABA), in retina (vertebrate), 553
Amyloidosis, lactoferrin-related, familial subepithelial corneal amyloidosis, 2756
Angiogenesis, inhibition, tissue inhibitor of metalloproteinase-3, 817
  letter, 2433
Angiostatic drugs, for corneal neovascularization (rabbit), 1954
Angiotensin II, suppression of CO_2-induced relaxation of retinal pericytes (bovine), 652
Animal handling (*letter*), 1053
Animal model

Copyright © Association for Research in Vision and Ophthalmology

Acanthamoeba keratitis, sugar inhibition of ameba binding to corneal epithelium in vitro (rabbit), 1858
arthroophthalmopathy, type II collagen in developing eye of del1 mice, 930
bleb leaks, transforming growth factor-β therapy (rabbit), 1630
canthaxanthin-induced retinal crystal-like inclusions (monkey), 741
congenital cataract, mapping of *CoC* locus on chromosome 16 (mice), 2502
corneal alkali injury
  inflammatory eicosanoids in corneal epithelium (rabbit), 1963
  synthetic metalloproteinase inhibitor action on neutrophil chemotaxis (rabbit), 1340
corneal graft rejection, topical FK506 in (rat), 901
cytomegalovirus retinitis in murine retrovirus-induced immunodeficiency (MAIDS), cytokine immunotherapy, 1411
diabetic retinopathy
  aldose reductase inhibitors in (rat), 1066
  kallikrein-binding protein in retina (streptozotocin diabetic rat), 658
endotoxin-induced uveitis
  P-selectin in (rat), 1610
  transforming growth factor β-1 in (mice), 257
experimental autoimmune anterior uveitis, induction via immunization with bovine melatonin-associated antigen without adjuvant (rat), 2171
experimental autoimmune uveitis, peroxynitrite and oxidative damage in (rat), 1333
generation of transgenic mouse model of *RDS*-mediated dominant retinitis pigmentosa, 498
glaucoma filtering surgery, effect of varying mitomycin-C treatment area (rabbit), 1639
optic nerve atrophy, retinal ganglion cell abnormalities in *Bst/+* mice, 2112
optic neuritis in experimental allergic encephalomyelitis, superoxide dismutases in (guinea pigs), 1203
orthotopic corneal transplantation in high-risk eyes (mice), 1130
oxygen-induced retinopathy (mice), 1168
photoreceptor degeneration in $Pdeg^{rm1}/Pdeg^{rm1}$ mice, effect of antiapoptotic BCL2 gene, 943
progressive rod-cone degeneration, dietary docosahexanoic acid and (dog), 2387
Pseudomonas aeruginosa keratitis
  IgG *P. aeruginosa* lipopolysaccharide-specific antibodies for (mice), 1418
  protease IV and corneal virulence, 1535
reattachement of extraocular muscles using fibrin glue (rabbit), 543
regulation of paracrine cytokine balance controlling collagenase synthesis by corneal cells (rabbit), 546
retinal degeneration, RPE cell tight junctions (RCS rat), 188
retinoschisislike alterations in Norrie disease mutant mice, 710
topical corticosteroid reversal of anti-adenoviral effect of topical cidofovir (rabbit), 253
Aniridia, Pax-6 homeobox gene in, 108
Anisometropia, prevalence and risk factors, in adult inner city population, 334
Anterior chamber, depth
  changes during accommodation, 569
  submicrometer precision biometry, 1304
Anterior chamber-associated immune deviation (ACAID)
ACAID-inducing signals after intracameral injection of antigen (mice), 2245
  effect of cyclosporine on ACAID with retinal transplantation (mice), 2152
  importance of antigen-bearing eye and spleen in (mice), 534
  induction of ACAID by corneal allograft placement in anterior chamber (mice), 2833
  suppression of corneal epithelial rejection (mice), 292
Anterior segment
  calponin distribution, 349
  changes during accommodation, 569
  fibrillin-containing microfibrils, 970
  influence of storage time, aqueous humor albumin, and osmolality on outflow facility (bovine), 2165
  muscarinic receptor subtypes in iris-ciliary body, 1434
  physiology, bumetanide inhibition of sodium-potassium-chloride cotransport and (monkey), 1700
  sodium-potassium-chloride cotransport in trabecular meshwork cells, dexamethasone modulation, 1229
  submicrometer precision biometry, 1304
  tumors, aqueous humor-mediated inhibition of natural killer cell activity and, 1277
Antibody(ies), recoverin autoantibodies, in cancer-associated retinopathy, 283
Antigen(s)
  intracameral injection, blood-borne ACAID-inducing signals (mice), 2245
  minor H antigens, orthotopic corneal transplantation in high-risk eyes (mice), 1130
  orthotopic corneal allograft rejection (mice), 1130
  RET-PE2, 2366
Antigen-presenting cells
  immunogenic potential of human fetal RPE cells, 2662
  in retina (rat), 1848
Antiinflammatory drugs, nonsteroidal (NSAIDs), in corneal pain, reduction of responsiveness of corneal polymodal nociceptors to chemical stimuli (cat), 1944
Antioxidants, superoxide dismutases in experimental optic neuritis (guinea pig), 1203
Antiproliferative agents
  electroporation and bleomycin in glaucoma filtration surgery (rabbit), 2864
  fibroblast exposure to, wound healing behavior and, 1998
Antiviral agents, corticosteroid reversal of anti-adenoviral effect of cidofovir (rabbit), 253
AP-1–CRE element, enhancer of chicken βA3/A1 crystallin gene, 951
Apoptosis
  apoptosis of lens epithelial cells after lens extraction (rabbit), 2322
  astrocytes (rat), 1653
  ischemia-induced, in cultured RPE cells, flupirtine and, 1390
  photoreceptor degeneration in $Pdeg^{rm1}/Pdeg^{rm1}$ mice, effect of antiapoptotic BCL2 gene, 943
  recoverin autoantibodies and apoptotic retinal cell death in cancer-associated retinopathy, 283
  retinal ganglion cell, *bcl-x*$_L$ expression, 2545
Appositional force, contact lens tonometry, ophthalmodynamometry, 2447
Aqueous humor
  albumin, outflow facility measurement and (bovine), 2165
  cellular infiltration, in endotoxin-induced uveitis, P-selectin and (rat), 1610
  drainage, choroidal lymphatic system (chick), 1241
  flow, timolol and (rabbit), 1274
  formation, bumetanide inhibition of sodium-potassium-chloride cotransport and (monkey), 1700
  lymphocytic infiltration, in HTLV-I uveitis, immunologic and virologic characterization, 676
  macrophage migration inhibitory factor expression in penetrating corneal injury (rat), 1555
  outflow facility. *See* Outflow facility

outflow resistance, trabecular meshwork hyaluronan content and, 1222
Arteriolar constriction, after branch retinal vein occlusion, nitric oxide release and (pig), 1450
Arthroophthalmopathy, type II collagen in developing eye of del1 mice, 930
Astigmatism, prevalence and risk factors, in adult inner city population, 334
Astrocytes
barrier properties of retinal vascular endothelial cells (bovine), 2423
retinal vascular development (rat), 1653
Attention
changed metrics of repeated saccades (monkey), 2810
visual attention processing, subcortical vs. cortical influences, 364
Autofluorescence
fundus, in age-related maculopathy, 478
lens, fluorometry for correcting B/Y perimetry results for lens yellowing, 697
Autoimmune uveitis, experimental, peroxynitrite and oxidative damage in (rat), 1333
Autoregulation
choroidal blood flow, perfusion pressure and, 1752
metabolic. *See* Metabolic autoregulation

B

Background light, changed metrics of repeated saccades (monkey), 2810
Bardet-Biedl syndrome, evaluation of recoverin gene for mutations in, 704
Barrier function, corneal epithelium, repeatability of permeability measurements, 1830
Basic fibroblast growth factor
induction of bFGF mRNA expression in Müller cells (rat), 1358
retinal, branch retinal vein occlusion and (cat), 972
Batten disease, mitochondrial localization of CLN3 protein in retina (mice), 2375
Behçet's disease, lymphocyte adherence to retinal vessel walls, 2608
Benedek, George B.
Proctor Lecture, 1911
Proctor Medal, 1909
Biglycan, in sclera, 1740
Biodegradable polymer microspheres, ganciclovir-loaded, in human CMV-inoculated eyes (rabbit), 665
Biomechanics
anterior lens capsule, aging and, 357
corneal, collagen fibril organization in corneal stroma, 121
Biometry, submicrometer precision biometry of anterior segment of eye, 1304
Bipolar cell(s), neuronal coupling of amacrine cells, 267
Bleomycin, electroporation and bleomycin in glaucoma filtration surgery (rabbit), 2864
Blepharospasm, doxorubicin chemomyectomy, prevention of injection site inflammation via corticotropin-releasing factor (rabbit), 834
Blinking, age-related changes, 92
Blood, blood-borne ACAID-inducing signals after intracameral injection of antigen (mice), 2245
Blood flow
choroidal
during isometric exercise, 2338
perfusion pressure and, 1752
ocular blood flow velocity, in untreated glaucoma, color Doppler imaging, 690
retinal, diacylglycerol and protein kinase C-β and (rat), 2711
retinal capillaries, metabolic autoregulation, pericytes in (bovine), 643, 652
retinal capillary network. *See* Pericyte(s)
retrobulbar, epinephrine and (monkey), 2655
Blood-retinal barrier
astrocytes and barrier properties of retinal vascular endothelial cells (bovine), 2423
effect of IL-1β (rat), 25
paracellular permeability of retinal capillary endothelium (bovine), 635
RPE cell tight junctions (RCS rat), 188
serum inhibition of tight junction formation in cultured RPE cells (rat), 1082
Blue-on-yellow perimetry
correlation with optic disc parameters, 2452
fluorometry of crystalline lens for correcting results, 697
Brachytherapy, ruthenium plaque brachytherapy, uveal melanoma histology, 2081
Bradykinin, ciliary artery relaxation, nitric oxide, endothelium-derived hyperpolarizing factor, and potassium channels in (pig), 1761
Brain, *Xenopus* Brn-3.0 expression, 960
Brain-derived neurotrophic factor, in ganglion cell axonal injury (rat), 1840
Bruch's membrane
hydraulic conductivity, site of major resistance to fluid transport, 762
reattachement of cultured RPE cells, 1110
resurfacing after RPE debridement (cat), 1094
Bullous pemphigoid autoantigen (BP 180), developmental expression of BP 180/type XVII collagen in cornea (chick), 153
Bumetanide, inhibition of sodium-potassium-chloride cotransport, anterior segment physiology and (monkey), 1700

C

Cadherin(s), E-cadherin, in lens epithelial cells of human cataracts, 579
Calcitonin gene-related peptide, relaxation in central retinal arteries (dog), 56
Calcium
calcium signaling in RPE cells during mechanical stimulation (rat), 176
capacitative calcium influx in corneal epithelial cells, endothelin isoform and receptor gene expression (bovine), 130
disc-plasma membrane fusion in rod outer segments, 487
disintegrative globulization, light transmission through single cortical lens fiber during (rat), 586
homeostasis, single cortical lens fibers (rat), 2300
intercellular wave propagation, effect of glucose concentration and protein phosphorylation on intercellular communication in cultured RPE cells (rat), 1598
intracellular, in lens, effect of purinergic and adrenergic receptor stimulation (sheep), 855
platelet-activating factor-induced cyclooxygenase-2 expression in corneal epithelium (rabbit), 2492
Calcium channel blockers, in corneal pain, reduction of responsiveness of corneal polymodal nociceptors to chemical stimuli (cat), 1944
Caloric restriction, long-term, proliferative capacity of lens epithelial cells (mice), 100
Cancer-associated retinopathy, recoverin autoantibodies and apoptotic retinal cell death in, 283
Canthaxanthin, crystal-like retinal inclusions (monkey), 741
Carbon dioxide
pericyte intracellular pH and contractility, metabolic autoregulation of retinal capillary blood flow (bovine), 643
pericyte relaxation, suppression by angiotensin II (bovine), 652
Carbonic anhydrase, membrane-associated, nonpigmented ciliary epithelium (rabbit), 2093

Carbonic anhydrase isozyme III, in ciliary processes and lens, 539
Carboplatin, hyperthermia plus, in retinoblastoma cell line (murine), 2516
Carotenoids
  canthaxanthin-induced retinal crystal-like inclusions (monkey), 741
  macular, binding by retinal tubulin (bovine), 167
  retinal, dietary modification, macular pigment density and, 1795
Cataract
  congenital, mapping of *CoC* locus on chromosome 16 (mice), 2502
  continuity of lipid membranes in lens fiber cells, 2826
  lovastatin-induced, small GTP-binding proteins in (rat), 2313
  phacoemulsification, initial complication rate in India, 2331
  a protein condensation disease, 1911
  retinal stray light, 1321
  secondary
    adhesion molecules in lens epithelial cells of human cataracts, 579
    apoptosis of lens epithelial cells after lens extraction (rabbit), 2322
  ultraviolet-B radiation and, 1003
Cataract extraction, extracapsular, posterior capsule opacification, in vitro capsular bag model, 396
Cathepsin G, mRNA levels in keratoconus corneas, 529
Cationic protein, eosinophil, corneal epithelial cell viability and morphology in vitro, 593
CD18 antigen, dexamethasone-induced suppression of NFkB and CD18-mediated leukocyte adhesion to cultured corneal endothelial cells (bovine), 2427
CD80 costimulatory molecule, transfer of CD80 costimulatory molecule into ocular melanoma, 2531
CD44 molecule
  in cultured RPE cells, 2027
  in lens epithelial cells of human cataracts, 579
cDNA libraries (*letter*), 1053
Cell adhesion
  cultured human corneal endothelial cells, 1119
  dexamethasone-induced suppression of NFkB and CD18-mediated leukocyte adhesion to cultured corneal endothelial cells (bovine), 2427
  lymphocyte adherence to retinal vessel walls, 2608
  reattachement of cultured RPE cells to RPE-derived extracellular matrix and Bruch's membrane, 1110
Cell adhesion molecules
  in lens epithelial cells of human cataracts, 579
  P-selectin in endotoxin-induced uveitis (rat), 1610
  in retinal ganglion cell axon regeneration into Schwann-cell graft (rat), 1401
  vitreous soluble intercellular adhesion molecule-1 levels in proliferative vitreoretinoapthy, 1043
Cell density
  corneal endothelium, aging and, 779
  corneal epithelial cell density in culture, regulation of paracrine cytokine balance controlling collagenase synthesis by corneal stromal cells (rabbit), 546
  retinal, in *Krd* mice, 919
Cell lineage
  correlation of Pax-6, Prox 1, and Chx10 homeobox gene expression with fate of retinal precursor cells (chick), 1293
  goblet cells from conjunctival keratinocytes, 753
Cell migration
  cultured RPE cells, *cis*-hydroxyproline inhibition (bovine), 520
  UV-B-induced mitochondrial dysfunction and migration of viable corneal epithelial cells in vitro, 620
Cell proliferation
  corneal epithelial cells, serum-free medium for, 2234
  corneal epithelial wound closure, epidermal growth factor stimulation of phosphatidylinositol 3-kinase in (rabbit), 1139
  cultured human corneal endothelial cells, 1119
  cultured RPE cells, *cis*-hydroxyproline inhibition (bovine), 520
  fibroblast growth factor-5 expression by choroidal microvascular endothelial cells in vitro (bovine), 2073
  growth factor-receptor systems in lens epithelial cells, 1543
  iris pigment epithelial cells in vitro (pig), 2255
  lens epithelial cells
    age-related decline, caloric restriction and (mice), 100
    protein-free capsular bag system, 396
  trabecular meshwork cells, effect of VIP in situ, 2781
  uveal melanoma after ruthenium plaque brachytherapy, 2081
Chandler's syndrome, endothelial metaplasia in, 1896
Chemical cauterization, in corneal transplantation, corneal neovascularization induced by (rat), 274
Chemokines
  GROα synthesis by corneal cells exposed to proinflammatory cytokines, 1149
  RPE cell IL-8 and monocyte chemotactic protein-1 secretion
    cytokine modulation, 446
    dexamethasone and cyclosporin A modulation, 436
Chemotaxis, neutrophil activity in alkali-degraded cornea, synthetic metalloproteinase inhibitor and, 1340
Chemotherapy
  carboplatin and hyperthermia in murine retinoblastoma cell line, 2516
  multidrug resistance in primary choridal melanoma, 2523
Chloride, sodium-potassium-chloride cotransport. *See* Membrane transport
Cholesterol, disc-plasma membrane fusion in rod outer segments, 487
Cholinergic nerve, ciliary artery smooth muscle tone (pig), 2261
Choriocapillaris
  argon laser photoocclusion (rat), 2702
  clinicopathologic correlation of localized RPE debridement, hydraulic vs. abrasive debridement (cat), 1094
Choroid
  blood flow
    during isometric exercise, 2338
    perfusion pressure and, 1752
  endothelium, fibroblast growth factor-5 expression (bovine), 2073
  lymphatic system (chick), 1241
  melanoma, multidrug resistance-related proteins, 2523
  TNF receptor mRNA in (mice), 9
  vascular changes in AMD (*letter*), 1290
Cidofovir, topical, anti-adenoviral effect, topical corticosteroid reversal of (rabbit), 253
Ciliary artery
  bradykinin-induced relaxation, nitric oxide, endothelium-derived hyperpolarizing factor, and potassium channels in (pig), 1761
  smooth muscle tone, nitroxidergic-cholinergic nerve interactions (pig), 2261
Ciliary body
  epithelium, connexin distribution (animals), 341
  fibrillin-containing microfibrils, 970
  HNK-1 epitope in inner connective tissue layer of ciliary body, 1426
Ciliary epithelium
  carbonic anhydrase isozyme III expression in, 539
  Na,K-ATPase response to phorbol ester, indomethacin and (rabbit), 866
  nonpigmented, membrane-associated carbonic anhydrase in (rabbit), 2093
Ciliary muscle

adjacent extracellular matrix, prostaglandin-induced changes, 2214
calponin distribution, 349
C-type natriuretic peptide- and sodium nitroprusside-induced cGMP formation and muscle relaxation, 2629
physiology, bumetanide inhibition of sodium-potassium-chloride cotransport and (monkey), 1700
prostaglandin-induced matrix metalloproteinase release from smooth muscle cells, 2772
Ciliary process, circadian β-adrenergic, VIP, and pituitary adenylate cyclase activating polypeptide receptor responsiveness (rabbit), 1708
Circadian cycle/rhythm, ciliary process β-adrenergic, VIP, and pituitary adenylate cyclase activating polypeptide receptor responsiveness during (rabbit), 1708
Citrate, neutrophil activity in alkali-degraded cornea, 1340
Cloning, molecular cloning of corneal βig (rabbit), 893
Collagen
collagen fibril organization in corneal stroma, 121
letter, 1289
synthesis, cultured RPE cells, *cis*-hydroxyproline inhibition (bovine), 520
type II, in developing eye of del1 mice, 930
type XII, in corneal extracellular matrices, 2408
type XVII, in corneal development (chick), 153
Collagenase
corneal stromal cell synthesis in vitro, effect of corneal epithelial cell density on paracrine cytokine balance controlling (rabbit), 546
in repair corneal fibroblasts, IL-1α autocrine feedback loop control, 1367
Color Doppler imaging
retrobulbar hemodynamics, epinephrine and (monkey), 2655
in untreated glaucoma, 690
Color vision
defects, in optic neuritis, 2278
disruption of conserved cysteine in X-linked green cone opsins, 1074
infants, 2183
macular function impairment in AMD, 469
variation in size of red and green visual pigment gene array, 1040
Complement system, in tears, 1
Computer technology
IOP measurement in living mice, 249
neural networks for keratoconus detection, 2290
ocular surface misalignment, Purkinje-image analysis via exact ray tracing, 1476
Cones. *See* Photoreceptor(s)
Cone transducin α-subunit (GNAT2), upstream silencer elements GNAT2 gene expression, 196
Confocal microscopy
calcium signaling in RPE cells during stimulation (rat), 176
continuity of lipid membranes in lens fiber cells in aged normal and cataractous lenses, 2826
fiber cell denucleation in lens (monkey), 178
Confocal optic disc tomography, correlation of B/Y perimetry results, 2452
Congenital cataract, mapping of *CoC* locus on chromosome 16 (mice), 2502
Congenital stationary night blindness, X-linked, localization of CSNBX locus between *RP2* and *RP3* on proximal Xp, 2750
Conjunctiva
epithelium
cytokeratin expression, 142
keratinocyte differentiation, 753
Pax-6 homeobox gene in, 108
fibrillin-containing microfibrils, 970
lymph follicle innervation (monkey), 884
paracellular and aqueous penetration routes (rabbit), 627
letter, 2177
Conjunctivitis
adenoviral, topical corticosteroid reversal of anti-adenoviral effect of cidofovir (rabbit), 253
allergic, cytokine expression in conjunctival cells, 1350
flow cytometry of impression cytology specimens, 1458
Connective tissue, HNK-1 epitope in inner connective tissue layer of ciliary body, 1426
Connexins
in ciliary body epithelia (animals), 341
in corneal epithelial healing (rabbit), 600
Contact lens, polysulfone contact lenses for UV dosimetry, 1485
Contact lens tonometry, 2447
Contraction
extracellular matrix, tractional force generation by Müller cells (pig), 456
Müller cell contraction-stimulating activity in human vitreous (pig), 2053
nitric oxide-cGMP pathway in cholinergic and tachykinergic contraction of iris sphincter muscle (rabbit), 1719
platelet-derived growth factor and RPE cell contraction of collagen gels, 824
retinal capillary pericytes, effect of carbon dioxide (bovine), 643
retinal contraction in vitro, 2064
Contrast sensitivity
in elderly population, 557
frequency-doubling contrast test, screening for glaucomatous visual field loss, 413
infants, 2183
in optic neuritis, 2278
SKILL Card testing, 207
spatiotemporal, macular function impairment in AMD, 469
Copper/zinc superoxide dismutase, in experimental optic neuritis (guinea pig), 1203
Cornea
absorption spectra in far ultraviolet region, 1283
alkali injury, synthetic metalloproteinase inhibitor action on neutrophil chemotaxis, 1340
asphericity, myopia and, 311
biomechanics, collagen fibril organization in corneal stroma, 121
letter, 1289
cryopreservation, dimethyl sulfoxide protocol for prevention of endothelial cell injury (rabbit), 1934
development, type XVII collagen in (chick), 153
diversity in extracellular matrices, type XII collagen variants and, 2408
electrical stimulation, correlation of vasodilation and secretion in lacrimal gland (cat), 2476
endothelium
assessment, suitability of organ-cultured corneas for transplantation, 16
cell density, aging and, 779
cell viability, in vitro assay (rabbit), 1929
dexamethasone-induced suppression of NFkB and CD18-mediated leukocyte adhesion to cultured corneal endothelial cells (bovine), 2427
human corneal endothelial cell culture, 1119
light-dependent streptozotocin-induced toxicity (rat), 995
metaplasia in iridocorneal endothelial syndrome, 1896
nitric oxide release after cytokine stimulation (bovine), 2045
permeablity, phorbol ester modulation (rabbit), 2649
epithelium
Acanthamoeba binding to (rabbit), 1858
alkali burn-induced synthesis of inflammatory eicosanoids (rabbit), 1963

cell density in culture, regulation of paracrine cytokine balance controlling collagenase synthesis by corneal stromal cells (rabbit), 546
connexin expression and cell communication in healing corneal epithelium (rabbit), 600
cultivation, growth, and differentiation in serum-free medium (rabbit), 2234
effects of eosinophil granule proteins on corneal epithelial cell viability and morphology in vitro, 593
endothelin receptor in corneal epithelial cells (bovine), 130
GROα expression by corneal cells exposed to proinflammatory cytokines, 1149
Pax-6 homeobox gene in, 108
permeability to fluorescein, repeatability study, 1830
platelet-activating factor-induced cyclooxygenase-2 expression, calcium and (rabbit), 2492
type XVII collagen in (chick), 153
UV-B-induced mitochondrial dysfunction and migration of viable corneal epithelial cells in vitro, 620
wound closure, topical substance P and (rabbit), 388
wound healing. *See* Wound healing
fibrillin-containing microfibrils, 970
HSV-1-induced scarring, HSV-1 glycoprotein K-induced exacerbation of (mice), 1213
βig, molecular cloning and in situ hybridization (rabbit), 893
lumican, macrophage receptors, 1159
neovascularization, angiostatic drugs in (rabbit), 1954
nerve fibers, architecture, 985
paracellular and aqueous penetration routes (rabbit), 627
letter, 2177
Pseudomonas aeruginosa binding to, secretory IgA inhibition (mice), 910
stroma
collagenase synthesis in vitro, effect of corneal epithelial cell density on paracrine cytokine balance controlling (rabbit), 546
cytokine production, UV radiation-induced, 2483
thickness, submicrometer precision biometry, 1304
transforming growth factor-β receptor expression, 1922
Corneal dystrophy, gelatinous droplike corneal dystrophy, lactoferrin in, 2756
Corneal pain, reduction by antiinflammatory drugs (cat), 1944
Corneal reflex techniques, ocular alignment mesurement, limbus center vs. entrance pupil center for, 2597
Corneal transplantation. *See also* Penetrating keratoplasty
ACAID and suppression of corneal epithelial rejection (mice), 292
corneal neovascularization induced by xenografts or chemical cautery (rat), 274
induction of ACAID by corneal allograft placement in anterior chamber (mice), 2833
orthotopic, in high-risk eyes (mice), 1130
suitability of organ-cultured corneas for, factors influencing, 16
Corticosteroid(s), topical, reversal of anti-adenoviral effect of topical cidofovir (rabbit), 253
Corticotropin-releasing factor, prevention of injection site inflammation in doxorubicin chemomyectomy (rabbit), 834
Critical flicker frequency, detection of glaucomatous visual field loss, 2270
Cryofixation, in vivo, structure and composition of precorneal tear film (rat), 381
Cryopreservation, corneal, dimethyl sulfoxide protocol for prevention of endothelial cell injury (rabbit), 1934
Crystallins
enhancer of chicken βA3/A1 crystallin gene, 951
extralenticular expression of crystallin genes in *Xenopus laevis*, 2764
in lens epithelial cells, growth factor-receptor systems and, 1543
Crystals, canthaxanthin-induced retinal crystal-like inclusions (monkey), 741
CTLA4Ig, stability of ocular adenovirus-mediated transgene expression (mice), 2224
C-type natriuretic peptide, cGMP formation and muscle relaxation in ciliary muscle and iris sphincter, 2629
Culture studies
adenosine-induced pericyte relaxation (bovine), 2695
adhesion molecules in lens epithelial cells of human cataracts, 579
antiproliferatives and fibroblast wound healing behavior after glaucoma filtration surgery, 1998
basic fibroblast growth factor-induced bFGF mRNA expression in Müller cells (rat), 1358
CD44 in cultured RPE cells, 2027
cis-hydroxyproline inhibition of proliferation, collagen synthesis, attachment, and migration of cultured RPE cells (bovine), 520
CO_2-induced relaxation of retinal pericytes, angiotensin II-induced suppression (bovine), 652
cytochalasin D effect on outflow facility and trabecular meshwork, 2790
dexamethasone and trabecular meshwork cell phagocytosis, 1902
dexamethasone-induced suppression of NFkB and CD18-mediated leukocyte adhesion to cultured corneal endothelial cells (bovine), 2427
effect of CO_2 on intracellular pH and contractility of retinal capillary pericytes (bovine), 643
effects of eosinophil granule proteins on corneal epithelial cell viability and morphology, 593
endothelin receptor in corneal epithelial cells (bovine), 130
fibroblast growth factor-5 expression by choroidal endothelial cells (bovine), 2073
flupirtine and apoptosis in cultured RPE cells, 1390
folate transport in cultured RPE cells, 1578
G proteins in lacrimal secretion (rabbit), 1261
GROα expression by corneal cells exposed to proinflammatory cytokines, 1149
growth factor-receptors systems in lens epithelial cells, 1543
high glucose and paracellular permeability of retinal capillary endothelium (bovine), 635
5-HT_{1A} receptors negatively coupled to cAMP production in cultured RPE cells, 510
human corneal endothelial cell culture, 1119
IL-1 receptor antagonist in Graves' orbital fibroblasts, 1018
immunity and immune privilege elicited by cultured RPE cell transplants (mice), 1619
immunogenic potential of human fetal RPE cells, 2662
inducible nitric oxide synthase expression in corneal endothelial cells and keratocytes after LPS and cytokine stimulation (bovine), 2045
intercellular communication in cultured RPE cells, effect of glucose concentration and protein phosphorylation (rat), 1598
iris pigment epithelial cell culture method (pig), 2255
MAP1B expression in RPE cells, 2852
membrane-associated carbonic anhydrase in nonpigmented ciliary epithelium (rabbit), 2093
methylcobalamin and glutamate-induced neurotoxicity in cultured retinal cells (rat), 848
Müller cell contraction-stimulating activity in human vitreous (pig), 2053
prostaglandin-induced alterations in ciliary muscle extracellular matrix, 2214
prostaglandin-induced matrix metalloproteinase release from ciliary smooth muscle cells, 2772
proteoglycans in human sclera, 1740

reattachement of cultured RPE cells to RPE-derived extracellular matrix and Bruch's membrane, 1110
regulation of paracrine cytokine balance controlling collagenase synthesis by corneal cells (rabbit), 546
repair phenotype in corneal fibroblasts controlled by IL-1α autocrine feedback loop, 1367
RPE cell attachment to and contraction of retina in vitro, 2064
serum-free medium for corneal epithelial cells, 2234
serum inhibition of tight junction formation in cultured RPE cells (rat), 1082
small GTP-binding proteins in lovastatin-induced cataract (rat), 2313
sodium-potassium-chloride cotransport in trabecular meshwork cells, dexamethasone modulation, 1229
trabecular meshwork, effect of phenoxyacetic acids (animals), 1526
tractional force generation by Müller cells (pig), 456
UV-B-induced mitochondrial dysfunction and migration of viable corneal epithelial cells in vitro, 620
vitronectin and serum-stimulated ROS uptake by cultured RPE cells, 1588
Cyclocryotherapy, IOP spikes during, 1012
Cycloplegia, submicrometer precision biometry of anterior segment in, 1304
Cyclosporin A
for corneal neovascularization induced by xenografts or chemical cautery (rat), 274
TNF-α-induced RPE chemokine secretion, 436
Cyclosporine, effect on ACAID with retinal transplantation (mice), 2152
Cytochalasin D, effect on outflow facility and trabecular meshwork, 2790
Cytochrome P-450, alkali burn-induced synthesis of inflammatory eicosanoids in corneal epithelium (rabbit), 1963
Cytokeratins, in conjunctival epithelium, 142
Cytokines
chemotactic. *See* Chemokines
conjunctival cell, in allergic conjunctivitis, 1350
corneal cell production, UV radiation and, 2483
corneal epithelial cell proliferation and differentiation, serum-free medium for study, 2234
in endotoxin-induced uveitis, TGFβ-1 in (mice), 25
IL-1 receptor antagonist in Graves' orbital fibroblasts, 1018
immunotherapy in cytomegalovirus retinitis in murine retrovirus-induced immunodeficiency (MAIDS), 1411
inflammatory, RPE chemokine secretion and, 436
nitric oxide release from corneal endothelial cells and keratocytes (bovine), 2045
platelet-derived growth factor and RPE cell contraction of collagen gels, 824
proinflammatory
in allergic conjunctivitis, 1350
GROα expression by corneal cells exposed to, 1149
RPE cell IL-8 and monocyte chemotactic protein-1 secretion and gene expression, 446
Cytomegalovirus retinitis
adoptive immunotherapy with CMV-specific immune cells in immunosuppressed host (mice), 301
ganciclovir-loaded biodegradable polymer microspheres in human CMV-inoculated eyes (rabbit), 665
in murine retrovirus-induced immunodeficiency (MAIDS), cytokine immunotherapy, 1411

D

Dark adaptation
macular function impairment in AMD, 469
in Sorsby's fundus dystrophy and vitamin A deficiency, rod plateaux during, 1786
Debridement, clinicopathologic correlation of localized RPE debridement, hydraulic vs. abrasive debridement (cat), 1094
Decorin, in sclera, 1740
Delayed hypersensitivity
effect of cyclosporine on ACAID with retinal transplantation (mice), 2152
immunity and immune privilege elicited by cultured RPE cell transplants (mice), 1619
induction of ACAID by corneal allograft placement in anterior chamber (mice), 2833
suppression of, importance of antigen-bearing eye and spleen in (mice), 534
Demographics, vision-disabled elderly, 2566
Dendritic cells, postnatal development of MHC class II-positive dendritic cells in iris (rat), 2639
Detection acuity, in peripheral vision, refractive error and, 2134
Development. *See* Growth and development
Dexamethasone
IL-1β-induced RPE chemokine secretion, 436
sodium-potassium-chloride cotransport in trabecular meshwork cells, 1229
suppression of NFkB and CD18-mediated leukocyte adhesion to cultured corneal endothelial cells (bovine), 2427
trabecular meshwork cell phagocytosis and, 1902
Diabetes mellitus
blood glucose effects on chromatic visually evoked potentials, 800
effect of glucose concentration and protein phosphorylation on intercellular communication in cultured RPE cells (rat), 1598
macular microcirculation and contrast sensitivity in, 1819
retinal hemodynamics, diacylglycerol and protein kinase C-β and (rat), 2711
Diabetic maculopathy, macular microcirculation and contrast sensitivity in early diabetes, 1819
Diabetic retinopathy
blood-retinal barrier breakdown, high glucose and paracellular permeability of retinal capillary endothelium (bovine), 635
endothelin expression in diabetic ocular tissues (rat), 2144
entoptic evaluation, 783
galactose-fed rat model, aldose reductase inhibitors in, 1066
hyperglycemic cytosolic reductive stress 'pseudohypoxia'(*letter*), 1467
kallikrein-binding protein in (streptozotocin diabetic rat), 658
nonproliferative
foveal cone function in, 1443
retinal and optic nerve vascular endothelial growth factor content, 36
photoreceptor changes in, 2355
retinal function, multifocal ERG, 2586
vascular endothelial growth factor, 2729
Diacylglycerol, retinal hemodynamics in diabetic rat, 2711
Dichlorofluorescein diacetate, fluorophotometric quantitation of oxidative stress in retina (rabbit), 2721
Diclofenac, in corneal pain, reduction of responsiveness of corneal polymodal nociceptors to chemical stimuli (cat), 1944
Diet
carotenoid intake, macular pigment density and, 1795
fish oil supplementation, progressive rod-cone degeneration and (dog), 2387
Differential display reverse transcription-polymerase chain reaction, MAP1B expression in RPE cells, 2852
Differentiation
corneal epithelial cells, serum-free medium for, 2234
correlation of Pax-6, Prox 1, and Chx10 homeobox gene expression with fate of retinal precursor cells (chick), 1293

differentiation potential of conjunctival keratinocytes, 753
lens, FGFR2 expression during (rat), 1688
lens cells, G-protein-based signal transduction during (chick), 241
Digital image analysis, fundus morphology in preterm children, 1184
Diltiazem, in corneal pain, reduction of responsiveness of corneal polymodal nociceptors to chemical stimuli (cat), 1944
Dimethyl sulfoxide, corneal cryopreservation, protocol for prevention of endothelial cell injury (rabbit), 1934
Discrimination, spatial discrimination at various eccentricities, 1029
Disintegrative globulization
calcium homeostasis of single cortical fibers and (rat), 2300
calcium-mediated, light transmission through single cortical lens fiber during (rat), 586
DNA fragmentation assay, fiber cell denucleation in lens (monkey), 178
DNA ploidy, uveal melanoma after ruthenium plaque brachytherapy, 2081
Docosahexaenoic acid
dietary supplementation, progressive rod-cone degeneration and (dog), 2387
sperm content, in retinitis pigmentosa, 2619
Dosimetry
ultraviolet radiation at ocular surface, measurement via polysulfone contact lenses, 1485
visible and UVB ocular-ambient exposure ratios for general population, 1003
Doxorubicin chemomyectomy, prevention of injection site inflammation via corticotropin-releasing factor (rabbit), 834
Drug delivery
electroporation and bleomycin in glaucoma filtration surgery (rabbit), 2864
ganciclovir-loaded biodegradable polymer microspheres in human CMV-inoculated eyes (rabbit), 665
paracellular and aqueous penetration routes in cornea, conjunctiva, and sclera (rabbit), 627
letter, 2177
Dry eye
flow cytometry of impression cytology specimens, 1458
self-reported assessment, 2469
Dystrophin, in cone cells, immunocytochemical localization (mice), 1627

E

Eccentricity, geometric distortions in facial features at various eccentricities, 1029
Edema, retinal vein occlusion, intravascular pressure and (cat), 2742
Edothelium-derived hyperpolarizing factor, in bradykinin-induced ciliary artery relaxation (pig), 1761
Eicosanoids
alkali burn-induced synthesis of inflammatory eicosanoids in corneal epithelium (rabbit), 1963
Na,K-ATPase response to phorbol ester in ciliary epithelium (rabbit), 866
Elastic fibers, HNK-1 epitope in inner connective tissue layer of ciliary body, 1426
Electrical stimulation, cornea and facial nerve root, correlation of vasodilation and secretion in lacrimal gland (cat), 2476
Electromagnetic search coil technique, age-related changes in blinking, 92
Electron microscopy
Acanthamoeba binding to corneal epithelium in vitro (rabbit), 1858
choroidal lymphatic system (chick), 1241
conjunctival lymph follicle innervation (monkey), 884
corneal nerve architecture, 985
density of pores in inner wall of Schlemm's canal and, 1517
dystrophin localization in cone cells (mice), 1627
fibrillin-containing microfibrils in anterior segment, 970
HNK-1 epitope in inner connective tissue layer of ciliary body, 1426
IL-1β and integrity of retina and blood-retinal barrier (rat), 25
light transmission through single cortical lens fiber during disintegrative globulization (rat), 586
photoreceptor sensitivity to mitochondrial blockade (rat), 1569
retinal ganglion cell axon regeneration into Schwann-cell graft (rat), 1401
structure and composition of precorneal tear film (rat), 381
Electro-oculography, eye movement recordings, documentation of development of infantile nystagmus, 767
Electroporation, electroporation and bleomycin in glaucoma filtration surgery (rabbit), 2864
Electroretinography
canthaxanthin-induced retinal crystal-like inclusions (monkey), 741
foveal cone function in nonproliferative diabetic retinopathy and macular edema, 1443
insulin and retinal electrophysiology (cat), 792
in *Krd* mice, 919
multifocal
in myopia, 2844
recording multifocal ERGs with fundus monitoring, 1049
retinal function in diabetic retinopathy, 2586
photoreceptor changes in diabetic retinopathy, 2355
retinoschisislike alterations in Norrie disease mutant mice, 710
Emmetropia
accommodative function, 1511
adult-onset and adult-progression of myopia in occupational group, 321
Endothelins
endothelin receptor-mediated calcium signaling and isoform expression in corneal epithelial cells (bovine), 130
expression in diabetic ocular tissues (rat), 2144
Endotoxin-induced uveitis
P-selectin in (rat), 1610
transforming growth factor β-1 in (mice), 257
Energy metabolism, photoreceptor sensitivity to mitochondrial blockade (rat), 1569
Enhancer, chicken βA3/A1 crystallin gene, 951
Entoptoscope, subjective monitoring of parafoveal retinopathy in diabetes, 783
Enzyme-linked immunosorbent assay
IL-6 in aqueous humor, in HTLV-1 uveitis, 676
kallikrein-binding protein in retina (streptozotocin diabetic rat), 658
vitreous soluble intercellular adhesion molecule-1 levels in proliferative vitreoretinoapthy, 1043
Eosinophil granule proteins, corneal epithelial cell viability and morphology in vitro, 593
Epidemiology
acute angle-closure glaucoma after diagnostic mydriasis, 2683
self-reported assessment of dry eye, 2469
visible and UVB ocular-ambient exposure ratios for general population, 1003
Epidermal growth factor
in lens epithelial cells, 1543
proliferation of cultured human corneal endothelial cells, 1119
stimulation of phosphatidylinositol 3-kinase in corneal epithelial wound closure (rabbit), 1139
3′-Epilutein, in retina, 1802
Epinephrine

calcium mobilization in lens (sheep), 855
retrobulbar injection, ocular circulation, color Doppler imaging (monkey), 2655
Epiretinal membranes
193-nm excimer laser-based microsurgical system for, 1825
RPE cell attachment to and contraction of retina in vitro, 2064
Episomal vector, transfer of CD80 costimulatory molecule into ocular melanoma, 2531
Esotropia, early vs. late onset, retrospective prediction from components of infantile squint syndrome, 719
Essential iris atrophy, endothelial metaplasia in, 1896
Excitotoxicity, retinal, neuronal and endothelial nitric oxide synthase in, 2038
Exercise, isometric, choroidal blood flow during, 2338
Exfoliation syndrome
clinically unilateral, autopsy analysis, 2008
HNK-1 epitope in inner connective tissue layer of ciliary body, 1426
Experimental allergic encephalomyelitis, superoxide dismutases in (guinea pigs), 1203
Experimental autoimmune anterior uveitis, induction via immunization with bovine melatonin-associated antigen without adjuvant (rat), 2171
Experimental autoimmune uveitis, peroxynitrite and oxidative damage in (rat), 1333
Extracellular matrix
adhesion and proliferation of cultured human corneal endothelial cells, 1119
ciliary muscle, prostaglandin-induced changes, 2214
contraction, tractional force generation by Müller cells (pig), 456
diversities in cornea and limbus, type XII collagen variants and, 2408
RPE-derived, reattachement of cultured RPE cells, 1110
Extraocular muscles
inferior oblique neurovascular bundle stiffness, 1314
inferior oblique recession, cyclorotatory changes after, 405
reattachement of extraocular muscles using fibrin glue (rabbit), 543
rectus muscle pulleys
location and stability, 227
smooth muscle innervation, 1774
Eyelid(s)
age-related changes in kinematics, 92
inflammation, doxorubicin chemomyectomy and, prevention via corticotropin-releasing factor (rabbit), 834
Eye movements
photo-oculographic and electro-oculographic recordings, development of infantile nystagmus, 767
pursuit
effects of eye and head position on horizontal and vertical smooth pursuit, 773
monocular asymmetry, retrospective prediction of early-onset esotropia, 719
smooth pursuit in twins before and after alcohol ingestion, 1768
saccadic, changed metrics of repeated saccades (monkey), 2810
three-dimensional, stability of ocular counterrolling and Listing's plane during static roll-tilts (monkey), 2103
Eye position, effect on horizontal and vertical smooth pursuit, 773

F

Face perception, geometric distortions in facial features at various eccentricities, 1029
Facial nerve, electrical stimulation, correlation of vasodilation and secretion in lacrimal gland (cat), 2476
Familial subepithelial corneal amyloidosis, lactoferrin in, 2756
Farnsworth-Munsell 100 hue test
macular function impairment in AMD, 469
in optic neuritis, 2278
Fatty acid composition, sperm and erythrocytes, in retinitis pigmentosa, 2619
Fibrillin, in pseudoexfoliation synrome, 970
Fibrin glue, reattachement of extraocular muscles (rabbit), 543
Fibroblast(s)
IL-1 receptor antagonist in Graves' orbital fibroblasts, 1018
repair phenotype in corneal fibroblasts controlled by IL-1α autocrine feedback loop, 1367
wound healing behavior, antiproliferative agents and, 1998
Fibroblast growth factor
basic. *See* Basic fibroblast growth factor
FGF-5, expression by choroidal endothelial cells in vitro (bovine), 2073
receptors, FGFR2 expression during lens development and differentiation (rat), 1688
Filtering surgery
bleb leaks, transforming growth factor-β therapy (rabbit), 1630
electroporation and bleomycin in (rabbit), 2864
mitomycin-C, effect of varying MMC treatment area (rabbit), 1639
Fish oil supplementation, progressive rod-cone degeneration and (dog), 2387
Fixation
frequency of seeing an illusory Kanizsa triangle, 2554
unstable, recording multifocal ERGs with fundus monitoring, 1049
FK506, topical, in corneal graft rejection model (rat), 901
Flicker perimetry, detection of glaucomatous visual field loss, temporal modulation perimetry vs. critical flicker frequency in, 2270
Flow cytometry, in impression cytology, 1458
Fluorescein, corneal epithelial permeability to, repeatability study, 1830
Fluorescein angiography
clinicopathologic correlation of localized RPE debridement, hydraulic vs. abrasive debridement (cat), 1094
macular microcirculation and contrast sensitivity in early diabetes, 1819
pathology of macular lesions from ultrashort laser pulses (monkey), 2204
Fluorescence microscopy, corneal endothelial metaplasia in iridocorneal endothelial syndrome, 1896
Fluorescence recovery after photobleaching (FRAP), effect of glucose concentration and protein phosphorylation on intercellular communication in cultured RPE cells (rat), 1598
Fluorography, acridine orange digital fluorography, leukocyte-endothelial interactions in retinal microcirculation, 811
Fluorometry, for correcting B/Y perimetry results for lens yellowing, 697
Fluorophotometry
corneal epithelial permeability to fluorescein, repeatability study, 1830
oxidative stress in retina (rabbit), 2721
5-Fluorouracil, antiproliferatives and fibroblast wound healing behavior after glaucoma filtration surgery, 1998
Flupirtine, apoptosis induction in cultured RPE cells, 1390
Flurbiprofen, in corneal pain, reduction of responsiveness of corneal polymodal nociceptors to chemical stimuli (cat), 1944
Folate, folate transport in cultured RPE cells, 1578
Forced-choice preferential looking, 2183
Foveal avascular zone, in diabetic retinopathy, subjective entoptic monitoring, 783
Friedenwald Award, Teller, Davida Y., 2181
Friedenwald Lecture, first glances: the vision of infants, 2183
Fundus, tessellated, in myopia, 2844

Fundus autofluorescence, in age-related maculopathy, 478
Fundus cyclometry, objective cycloposition after inferior oblique recession, 405
Fundus monitoring, in multifocal electroretinography, 1049
Fundus photography, fundus morphology in preterm children, 1184
Fusion, infants, 2183

G

Gain, saccadic (monkey), 2810
Galactose, retinal microangiopathies, aldose reductase inhibitors and (rat), 1066
Ganciclovir, ganciclovir-loaded biodegradable polymer microspheres in human CMV-inoculated eyes (rabbit), 665
Ganglion cell(s), retinal
  abnormalities in *Bst/+* mice, 2112
  adeno-associated virus-mediated gene transfer (mice), 2857
  apoptosis, *bcl-x*$_L$ expression, 2545
  axon regeneration into Schwann-cell graft (rat), 1401

Graves' ophthalmopathy, IL-1 receptor antagonist in, 1018
Green fluorescent protein, assessment of adeno-associated virus-mediated retinal transduction (mice), 2857
Growth and development
astrocytes and retinal vascular development (rat), 1653
correlation of Pax-6, Prox 1, and Chx10 homeobox gene expression with fate of retinal precursor cells (chick), 1293
critical development period, photoreceptor death/survival, tissue oxygen levels and (RCS rat), 1667
development and aging of RPE cell topography, 2016
differential expression of *maf*-1 and *maf*-2 protooncogenes in developing lens (rat), 2679
extralenticular expression of crystallin genes in *Xenopus laevis*, 2764
fundus morphology in preterm children, 1184
lens, FGFR2 expression during (rat), 1688
postnatal development of MHC class II-positive dendritic cells in iris (rat), 2639
retinal development in *Bst/+* mice, 2112
retinoic acid in retinal and eye development, 1471
rod-mediated retinal function in children with history of mild ROP, 1175
scleral growth modulation by visual stimulation (chick), 1726
trabecular meshwork cells, VIP stimulation, 2781
type II collagen in developing eye of del1 mice, 930
vision of infants, 2183
Growth factors
corneal epithelial cell proliferation and differentiation, serum-free medium for study, 2234
human vitreous, tractional force generation by Müller cells (pig), 2053
in lens epithelial cells, 1543
proliferation of cultured human corneal endothelial cells, 1119
tractional force generation by Müller cells (pig), 456
Guanosine monophosphate, cyclic
activation of maxi-K-channels in trabecular meshwork cells (bovine), 1883
in adrenomedullin-induced relaxation of central retinal arteries (dog), 56
nitric oxide-cGMP pathway in cholinergic and tachykinergic contraction of iris sphincter muscle (rabbit), 1719
Guanosine triphosphate-binding proteins. *See* G proteins

H

Habituation, stability of ocular counterrolling and Listing's plane during static roll-tilts (monkey), 2103
Haplotype analysis
localization of CSNBX locus between *RP2* and *RP3* on proximal Xp, 2750
X-linked retinitis pigmentosa, disease expression caused by putative null mutation in *RPGR*, 1983
Head position, effect on horizontal and vertical smooth pursuit, 773
Hemidesmosomes, corneal, developmental expression of type XVII collagen (chick), 153
Hemifacial spasm, doxorubicin chemomyectomy, prevention of injection site inflammation via corticotropin-releasing factor (rabbit), 834
Hemorrhage
intraretinal, ultrashort laser pulses and (monkey), 2204
retinal vein occlusion, intravascular pressure and (cat), 2742
Hepatocyte growth factor
in lens epithelial cells, 1543
proliferation of cultured human corneal endothelial cells, 1119
Hereditary retinal degeneration, retinitis pigmentosa. *See* Retinitis pigmentosa
Hereditary retinal dystrophy, Sorsby's fundus dystrophy. *See* Sorsby's fundus dystrophy
Herpes simplex virus, TNF receptor in HSV-infected eyes (mice), 9
Herpes simplex virus type 1, HSV-1 glycoprotein K-induced exacerbation of HSV-1 corneal scarring (mice), 1213
Hexose-monophosphate shunt, retinal activity, glucose and (rat), 62
Hirschberg ratio, 2597
HIV/AIDS, cytomegalovirus retinitis, ganciclovir-loaded biodegradable polymer microspheres in human CMV-inoculated eyes (rabbit), 665
HLA antigens. *See* Major histocompatibility complex (MHC) antigens
Homeobox genes
correlation of Pax-6, Prox 1, and Chx10 expression with fate of retinal precursor cells (chick), 1293
Pax-6 homeobox gene expression in ocular surface epithelia (vertebrates), 108
Human T-cell leukemia virus type-1 (HTLV-1), uveitis, lymphocytic infiltration of aqueous humor, immunologic and virologic characterization, 676
Hyaluronan, trabecular meshwork, aqueous outflow resistance and, 1222
Hydraulic conductivity, Bruch's membrane, site of major resistance to fluid transport, 762
3-Hydroxy-β,ε-caroten-3′-one, in retina, 1802
3-Hydroxy-3-methylglutaryl coenzyme A (HMG CoA) reductase inhibitor, lovastatin, 2313
cis-Hydroxyproline, inhibition of proliferation, collagen synthesis, attachment, and migration of cultured RPE cells (bovine), 520
5-Hydroxytryptamine, 5-HT_{1A} receptors negatively coupled to cAMP production in cultured RPE cells, 510
Hyperglycemia, hyperglycemic cytosolic reductive stress 'pseudohypoxia' (*letter*), 1467
Hyperopia
prevalence and risk factors, in adult inner city population, 334
scleral growth (chick), 1726
Hyperoxia, glucose metabolism in outer retina (cat), 48
Hyperthermia, carboplatin plus, in retinoblastoma cell line (murine), 2516
Hypoglycemia, insulin and retinal electrophysiology (cat), 792

Hypoxia
astrocyte degeneration (rat), 1653
photoreceptor death in retinal dystrophy (RCS rat), 1667

I

βig, corneal, molecular cloning and in situ hybridization (rabbit), 893
Illuminance, using two preferred retinal loci for different lighting conditions in patients with central scotomas, 1812
Illusory figure perception, effects of spatial configuration and number of fixations, 2554
Immune privilege
cellular immunity and stability of ocular adenovirus-mediated transgene expression (mice), 2224
cultured RPE cell transplants and (mice), 1619
effect of cyclosporine on ACAID with retinal transplantation (mice), 2152
induction of ACAID by corneal allograft placement in anterior chamber (mice), 2833
Immunization
HSV-1 glycoprotein K, exacerbation of HSV-1 corneal scarring (mice), 1213
secretory IgA modulation of *Pseudomonas keratitis (mice), 910*
Immunocytochemistry
connexin distribution in ciliary body (animals), 341
correlation of Pax-6, Prox 1, and Chx10 homeobox gene expression with fate of retinal precursor cells (chick), 1293
cytokeratin expression in conjunctival epithelium, 142
cytokine expression in conjunctival cells in allergic conjunctivitis, 1350
dystrophin localization in cone cells (mice), 1627
fibrillin-containing microfibrils in anterior segment, 970
IL-1 receptor antagonist in Graves' orbital fibroblasts, 1018
immunologic and virologic characterization of cellular infiltrate in aqueous humor of human T-cell leukemia virus type-1 uveitis, 676
MAP1B expression in RPE cells, 2852
mitochondrial localization of Batten disease (CLN3) protein in retina (mice), 2375
P-selectin in endotoxin-induced uveitis (rat), 1610
superoxide dismutases in experimental optic neuritis (guinea pig), 1203
Immunoglobulin(s)
immunoglobulin diffusion into grafted cornea, effect of fresh corneal wound or healed corneal scar (rat), 876
secretory IgA, modulation of *Pseudomonas* keratitis (mice), 910
Immunohistochemistry
fast myosin heavy chain expression in levator palpebrae and retractor bulbi muscles (rabbit), 2817
IL-1β and integrity of retina and blood-retinal barrier (rat), 25
innervation of extraocular pulley smooth muscle, 1774
lymphocyte adherence to retinal vessel walls, 2608
macrophage migration inhibitory factor expression in penetrating corneal injury (rat), 1555
MHC class II expression in retina (rat), 1848
Pax-6 homeobox gene expression in ocular surface epithelia (vertebrates), 108
topical FK506 in corneal graft rejection model (rat), 901
vascular endothelial growth factor and vascular permeability in diabetic retinopathy, 2729
Immunology
ACAID and suppression of corneal epithelial rejection (mice), 292
adoptive transfer of CMV-immune lymph node cells and retinitis in T-cell-depleted mice, 301
apoptotic retinal cell death induced by antirecoverin autoantibodies of cancer-associated retinopathy, 283
cellular immunity and stability of ocular adenovirus-mediated transgene expression (mice), 2224
complement and complement regulatory proteins in tears, 1
corneal neovascularization induced by xenografts or chemical cautery (rat), 274
cytokine immunotherapy in cytomegalovirus retinitis in murine retrovirus-induced immunodeficiency (MAIDS), 1411
effect of cyclosporine on ACAID with retinal transplantation (mice), 2152
exacerbation of HCV-1-induced corneal scarring by HSV-1 glycoprotein K vaccination (mice), 1213
ganciclovir-loaded polymer microspheres in human CMV-inoculated eyes (rabbit), 665
βig in cornea (rabbit), 893
IgG *P. aeruginosa* lipopolysaccharide-specific antibodies, efficacy in *Pseudomonas* keratitis (mice), 1418
IL-1β-induced leukocyte recruitment to retina (rat), 25
IL-1 receptor antagonist in Graves' ophthalmopathy, 1018
immunity and immune privilege elicited by cultured RPE cell transplants (mice), 1619
immunogenic potential of human fetal RPE cells, 2662
induction of ACAID by corneal allograft placement in anterior chamber (mice), 2833
influx of immunoglobulins from vascular compartment into grafter cornea (Rat), 876
lymphocyte infiltration of aqueous humor in human T-cell leukemia virus type-1 uveitis, 665
P-selectin in endotoxin-induced uveitis (rat), 1610
secretory IgA modulation of *Pseudomonas* keratitis (mice), 910
sensory innervation of conjunctival lymph follicles (monkey), 884
suitability of organ-cultured corneas for transplantation, 16
superoxide dismutase in experimental optic neuritis (guinea pig), 1203
TNF receptor mRNA in HSV-infected eyes (mice), 9
topical FK506 in corneal graft rejection model (rat), 901
Immunoprecipitation
crystallins in lens epithelial cells, growth factor-receptor systems and, 1543
muscarinic receptor subtypes in iris-ciliary body, 1434
Immunoprophylaxis
IgG *P. aeruginosa* lipopolysaccharide-specific antibodies, efficacy in *Pseudomonas* keratitis (mice), 1418
secretory IgA modulation of *Pseudomonas* keratitis (mice), 910
Immunoregulation
ACAID and suppression of corneal epithelial rejection (mice), 292
cyclosporin A for corneal angiogenesis after xenotransplantation or chemical cauterization (rat), 274
Immunotherapy
adoptive transfer of murine CMV-immune lymph node cells to T-cell-depleted mice, CMV retinitis and, 301
cytokine immunotherapy in cytomegalovirus retinitis in murine retrovirus-induced immunodeficiency (MAIDS), 1411
IgG *P. aeruginosa* lipopolysaccharide-specific antibodies, efficacy in *Pseudomonas* keratitis (mice), 1418
Impression cytology
cytokeratin expression in conjunctival epithelium, 142
flow cytometry in, 1458
Inclusions, canthaxanthin-induced retinal crystal-like inclusions (monkey), 741
Indacrinone, aqueous humor outflow facility and (animals), 1526
Indomethacin
in corneal pain, reduction of responsiveness of corneal polymodal nociceptors to chemical stimuli (cat), 1944
Na,K-ATPase response to phorbol ester in ciliary epithelium (rabbit), 866

Infantile esotropia, without nystagmus, motion detection deficits, 219
Infantile nystagmus, development, documentation via photo-oculographic and electro-oculographic eye movement recordings, 767
Infantile squint syndrome
components, retrospective prediction of early-onset esotropia from, 719
no more "squint" please (*letter*), 1465
Infant vision, development, 2183
Inflammation
conjunctival, flow cytometry of impression cytology specimens, 1458
corneal, UV-mediated, 2483
corneal pain, antiinflammatory drugs in (cat), 1944
eyelid, doxorubicin chemomyectomy and, prevention via corticotropin-releasing factor (rabbit), 834
ocular, endotoxin-induced uveitis, TGFβ-1 in (mice), 25
retinal
effect of IL-1β (rat), 25
intercellular adhesion molecule-1 levels, 1043
Inflammatory response, retinal, IL-1β-induced (rat), 25
In situ hybridization
cathepsin G, acid phosphatase, and α1-proteinase inhibitor mRNA levels in keratoconus corneas, 529
corneal βig (rabbit), 893
correlation of Pax-6, Prox 1, and Chx10 homeobox gene expression with fate of retinal precursor cells (chick), 1293
FGFR2 expression during lens development and differentiation (rat), 1688
Pax-6 homeobox gene expression in ocular surface epithelia (vertebrates), 108
platelet-activating factor receptor mRNA in eye (rat), 2672
TNF receptor mRNA in HSV-infected eyes (mice), 9
type II collagen in developing eye of del1 mice, 930
Instrumentation, accuracy of ocular alignment mesurement, corneal reflex techniques, limbus vs. pupil center for, 2597
Insulin, effects on retinal electrophysiology (cat), 792
Insulin-like growth factor-I
human vitreous, tractional force generation by Müller cells (pig), 2053
tractional force generation by Müller cells (pig), 456
Integrin(s)
β-integrin, in lens epithelial cells of human cataracts, 579
β_1-subunit, reattachement of cultured RPE cells to RPE-derived extracellular matrix and Bruch's membrane, 1110
$\alpha v\beta 5$ integrin, serum stimulation of ROS uptake by cultured RPE cells, 1588
Intercellular adhesion molecule-1 (ICAM-1)
in lens epithelial cells of human cataracts, 579
in proliferative vitreoretinopathy, 1043
Interferometry, dual-beam partial coherence interferometry, submicrometer precision biometry of anterior segment of eye, 1304
Interferon(s), IFN-α, leukocyte entrapment in retinal microcirculation, effects of prednisolone, platelet-activating factor receptor antagonist, or superoxide dismutase (rat), 811
Interleukin(s)
IL-1α
GROα expression by corneal cells exposed to, 1149
repair phenotype in corneal fibroblasts controlled by IL-1α autocrine feedback loop, 1367
stromal cell collagenase synthesis in vitro (rabbit), 546
IL-1β
integrity of retina and blood-retinal barrier (rat), 25
platelet-derived growth factor and RPE cell contraction of collagen gels, 824
RPE cell chemokine secretion, dexamethasone and cyclosporin A modulation, 436
IL-1 receptor antagonist, in Graves' ophthalmopathy, 1018
IL-2, immunotherapy of cytomegalovirus retinitis in murine retrovirus-induced immunodeficiency (MAIDS), 1411
IL-6
in aqueous humor, in HTLV-1 uveitis, 676
in endotoxin-induced uveitis, TGFβ-1 in (mice), 25
IL-8
in repair corneal fibroblasts, IL-1α autocrine feedback loop control, 1367
RPE cell secretion
dexamethasone and cyclosporin A modulation, 436
modulation by T-lymphocyte products, 446
IL-12, immunotherapy of cytomegalovirus retinitis in murine retrovirus-induced immunodeficiency (MAIDS), 1411
Intraocular pressure (IOP)
choroidal lymphatic system and (chick), 1241
circadian effects of timolol, ciliary process β-adrenergic, VIP, and pituitary adenylate cyclase activating polypeptide receptor responsiveness and (rabbit), 1708
contact lens tonometry, 2447
measurement in living mice, 249
pressure spikes during cyclocryotherapy, 1012
In vitro assay, corneal endothelial cell viability (rabbit), 1929
Iridocorneal endothelial syndrome, endothelial metaplasia in, 1896
Iris
calponin distribution, 349
in clinically unilateral exfoliation syndrome, 2008
fibrillin-containing microfibrils, 970
pigment epithelial cell culture technique (pig), 2255
postnatal development of MHC class II-positive dendritic cells in iris (rat), 2639
TNF receptor mRNA in (mice), 9
Iris-ciliary body
muscarinic receptor subtypes, 1434
norepinephrine release, peroxides and, 842
P-selectin, in endotoxin-induced uveitis (rat), 1610
Iris sphincter muscle
cholinergic and tachykinergic contraction, nitric oxide-cGMP pathway in (rabbit), 1719
C-type natriuretic peptide- and sodium nitroprusside-induced cGMP formation and muscle relaxation, 2629
Ischemia
ischemia-induced apoptosis in cultured RPE cells, flupirtine and, 1390
nitric oxide release and arteriolar constriction after branch retinal vein occlusion (pig), 1450
retinal, macular microcirculation and contrast sensitivity in early diabetes, 1819
Ischemia-reperfusion injury, retinal degeneration, genistein in (rat), 1193
Isometric exercise, choroidal blood flow during, 2338
Isoprenylation, small GTP-binding proteins, lovastatin-induced cataract (rat), 2313

J

Juvenile ceroid-lipofuscinosis, mitochondrial localization of CLN3 protein in retina (mice), 2375

K

Kallikrein-binding protein, in retina (streptozotocin diabetic rat), 658
Kanizsa triangle perception, effects of spatial configuration and number of fixations, 2554
Keratinocyte(s), conjunctival, differentiation potential, 753

Keratinocyte growth factor, in lens epithelial cells, 1543
Keratitis
Acanthamoeba, animal model, sugar inhibition of ameba binding to corneal epithelium in vitro (rabbit), 1858
Pseudomonas aeruginosa
IgG *P. aeruginosa* lipopolysaccharide-specific antibodies for (mice), 1418
protease IV in (animals), 1535
secretory IgA modulation (mice), 910
Keratoconjunctivitis. *See* Vernal keratoconjunctivitis
Keratoconus
collagen fibril organization in corneal stroma, 121
letter, 1289
detection, neural network approach, 2290
gene expression of cathepsin G, acid phosphatase, and α1-proteinase inhibitor in cornea, 529
Keratoconus suspect, detection, neural network approach, 2290
Keratocytes, corneal
GROα expression after exposure to proinflammatory cytokines, 1149
nitric oxide release after cytokine stimulation (bovine), 2045
Keratoepithelioplasty, ACAID and suppression of corneal epithelial rejection (mice), 292
Keratoplasty, immunoglobulin diffusion into grafted cornea, effect of fresh corneal wound or healed corneal scar (rat), 876
Ki-67 labeling index, uveal melanoma after ruthenium plaque brachytherapy, 2081

L

Lacrimal gland
secretion, G_s and $G_{q/11}$ in (rabbit), 1261
vasodilation and secretion, electrical stimulation of cornea and facial nerve root and (cat), 2476
VIP signal transduction pathway, 610
Lactate formation, glucose metabolism in outer retina, effects of light and hyperoxia (cat), 48
Lactoferrin, in familial subepithelial corneal amyloidosis, 2756
Lacunae, choroidal lymphatic system (chick), 1241
Laser Doppler flowmetry
choroidal blood flow during isometric exercise, 2338
perfusion pressure and choroidal blood flow, 1752
Laser therapy
absorption spectra of corneas in far ultraviolet region, 1283
argon laser photoocclusion of choriocapillaris (rat), 2702
193-nm excimer laser-based microsurgical system for vitreoretinal surgery, 1825
pathology of macular lesions from ultrashort laser pulses (monkey), 2204
retinal injury, neuroprotective and antiproliferative effects of MK-801 (rat), 1380
Laser trabeculoplasty, trabecular meshwork cell growth, VIP stimulation, 2781
Latency, saccadic (monkey), 2810
Latent class analysis, self-reported assessment of dry eye, 2469
Learning, perceptual learning and Vernier acuity improvement in adult amblyopia, 1493
Leber congenital amaurosis, evaluation of recoverin gene for mutations in, 704
Lens of eye
biomechanics of anterior lens capsule, aging and, 357
calcium mobilization, purinergic and adrenergic receptors in (sheep), 855
carbonic anhydrase isozyme III expression in, 539
cell differentiation, G-protein-based signal transduction during (chick), 241
changes during accommodation, 569
continuity of lipid membranes in lens fiber cells in aged normal and cataractous lenses, 2826
development and differentiation, FGFR2 expression during (rat), 1688
disintegrative globulization
calcium homeostasis of single cortical fibers and (rat), 2300
light transmission through single cortical lens fiber during (rat), 586
enhancer of chicken βA3/A1 crystallin gene, 951
epithelial cell proliferation
age-related decline, caloric restriction and (mice), 100
protein-free capsular bag system, 596
epithelium
adhesion molecules in lens epithelial cells of human cataracts, 579
apoptosis of lens epithelial cells after lens extraction (rabbit), 2322
growth factor-receptors systems, 1543
fiber cell denucleation (monkey), 178
light scattering, wavelength and angle (depth) and, 1321
*maf*1 and *maf*2 protooncogenes in developing lens (rat), 2679
major intrinsic protein (bovine), primary structure, 2508
single cortical lens fiber
calcium homeostasis (rat), 2300
light transmission during disintegrative globulization (rat), 586
thickness, submicrometer precision biometry, 1304
yellowing, fluorometry for correcting B/Y perimetry results for lens yellowing, 697

Lipid compostion, sperm and erythrocytes, in retinitis pigmentosa, 2619
Lipid peroxidation, in experimental autoimmune uveitis (rat), 1333
Lipofuscin, RPE content, in AMD, 478
Lipopolysaccharide (LPS)
IgG *P. aeruginosa* lipopolysaccharide-specific antibodies, efficacy in *Pseudomonas* keratitis (mice), 1418
nitric oxide release from corneal endothelial cells and keratocytes (bovine), 2045
Lipoxygenase, alkali burn-induced synthesis of inflammatory eicosanoids in corneal epithelium (rabbit), 1963
Listing's law, stability of ocular counterrolling and Listing's plane during static roll-tilts (monkey), 2103
Lovastatin, cataract, small GTP-binding proteins in (rat), 2313
Low-vision, demographic characteristics of vision-disabled elderly, 2566
Lumican, macrophage receptors, 1159
Lung resistance protein, multidrug resistance in choroidal melanoma, 2523
Lutein
dietary intake, macular pigment density and, 1795
macular, binding by retinal tubulin (bovine), 167
oxidative metabolites, in retina, 1802
Lymphatic system, choroid (chick), 1241
Lymphocyte(s), adherence to retinal vessel walls, 2608
Lymphocytic infiltration, aqueous humor, in HTLV-1 uveitis, immunologic and virologic characterization, 676
Lymphoid tissues, conjunctival lymph follicle innervation (monkey), 884

M

Macrophage(s), macrophage receptors for lumican, 1159
Macrophage migration inhibitory factor, in corneal wound healing (rat), 1555
Macula, recovery function, macular function impairment in AMD, 469
Macular degeneration, age-related
choroidal vascular changes in (*letter*), 1290
fundus autofluorescence in, 478
hydraulic conductivity of Bruch's membrane, 762
macular function impairment, 469
photoprotective effects of macular carotenoids, 167
protective effects of dietary carotenoids, 1795
retinal expression of MHC class II antigens in, 2125
tissue inhibitor of metalloproteinase-3 in, 1060
Macular dystrophy, recording multifocal ERGs with fundus monitoring, 1049
Macular edema, in nonproliferative diabetic retinopathy, foveal cone ERG in, 1443
Macular pigment, density, dietary carotenoid intake and, 1795
Maculopathy
age-related, demographic characteristics of vision-disabled elderly, 2566
using two preferred retinal loci for different lighting conditions, 1812
Magnetic resonance imaging (MRI), rectus muscle pulleys, location and stability, 227
Major basic protein, eosinophil, corneal epithelial cell viability and morphology in vitro, 593
Major histocompatibility complex (MHC) antigens
class II expression in neural retinal microglial and vascular elements in AMD, 2125
class II expression in retina (rat), 1848
expression by human fetal RPE cells, 2662
HLA class I antigen expression, in uveal melanoma, 1865
HLA-DR in conjunctival inflammation, flow cytometry of impression cytology specimens, 1458
orthotopic corneal transplantation in high-risk eyes (mice), 1130
postnatal development of MHC class II-positive dendritic cells in iris (rat), 2639
Major intrinsic protein, lens, primary structure (bovine), 2508
Manganese superoxide dismutase, in experimental optic neuritis (guinea pig), 1203
Mapping
mapping of *CoC* locus on chromosome 16 (mice), 2502
phosphorylation site of lens major intrinsic protein (bovine), 2508
retinal function in diabetic retinopatghy, multifocal ERG in, 2586
Mass spectrometry, major intrinsic protein (bovine lens), 2508
Matrix metalloproteinases, release from ciliary smooth muscle cells, prostaglandins and, 2772
Maxi-K-channels, trabecular meshwork, activation by cGMP (bovine), 1883
Mechanical stimulation, calcium signaling in RPE cells (rat), 176
Melanoma
choroidal, multidrug resistance-related proteins, 2523
ocular, gene therapy, 2531
uveal
HLA class I antigen expression, 1865
ruthenium plaque brachytherapy, histologic study, 2081
Melatonin-associated antigen, bovine, induction of experimental autoimmune anterior uveitis (rat), 2171
Membrane transport, sodium-potassium-chloride cotransport
bumetanide inhibition, aqueous formation and outflow facility and (monkey), 1700
in trabecular meshwork cells, dexamethasone modulation, 1229
Meta-analysis, open-angle glaucoma prevalence and incidence, 83
Metabolic autoregulation
adenosine-induced pericyte relaxation (bovine), 2695
retinal capillary blood flow
angiotensin II-induced suppression of CO_2-induced relaxation of pericytes (bovine), 652
pericytes in (bovine), 643
Metabolic control
blood glucose effects on chromatic visually evoked potentials, 800
nitric oxide release and arteriolar constriction after branch retinal vein occlusion (pig), 1450
Metabolic cooperation, cell communication in healing corneal epithelium (rabbit), 600
Metabolism. *See* Glucose metabolism
Metaplasia, corneal endothelial metaplasia in iridocorneal endothelial syndrome, 1896
Methylcobalamin, protection against glutamate-induced neurotoxicity in cultured retinal cells (rat), 848
N^5-Methyltetrahydrofolate, uptake, in cultured RPE cells, 1578
Microfibrils
fibrillin-containing, anterior segment distribution, 970
HNK-1 epitope in inner connective tissue layer of ciliary body, 1426
Microtubule(s), trabecular meshwork, effect of phenoxyacetic acids (animals), 1526
Microtubule-associated protein 1B, in RPE cells, 2852
Minor H antigens, orthotopic corneal transplantation in high-risk eyes (mice), 1130
Mitochondria
inhibition, photoreceptor sensitivity to (rat), 1569
localization of Batten disease (CLN3) protein in retina (mice), 2375
UV-B-induced mitochondrial dysfunction and migration of viable corneal epithelial cells in vitro, 620
Mitomycin-C

antiproliferatives and fibroblast wound healing behavior after glaucoma filtration surgery, 1998
filtering surgery, effect of varying MMC treatment area (rabbit), 1639
MK-801, neuroprotective and antiproliferative effects, in retinal laser injury (rat), 1380
Models/modeling
cell-free lysis model, disc-plasma membrane fusion in rod outer segments, 487
in vitro protein-free capsular bag system, lens epithelial cell proliferation, 396
spatial integration and contrast variance in visual pattern discrimination, 260
static accommodation model, differences in accommodation between emmetropia and late-onset myopia, 1511
visible and UVB ocular-ambient exposure ratios for general population, 1003
Molecular biology. *See* Gene expression; Genetics
Molecular condensation diseases, 1911
Molecular weight, topical agent, paracellular and aqueous penetration routes in cornea, conjunctiva, and sclera (rabbit), 627
Monocyte chemotactic protein-1, RPE cell secretion
dexamethasone and cyclosporin A modulation, 436
modulation by T-lymphocyte products, 446
Morphometry
corneal endothelial cell changes over 10-year period, 779
cytochalasin D effect on outflow facility and trabecular meshwork, 2790
density of pores in inner wall of Schlemm's canal, 1517
fundus morphology in preterm children, 1184
Motion detection/perception
deficits, in infantile esotropia without nystagmus, 219
monocular asymmetry, retrospective prediction of early-onset esotropia, 719
Motion processing, infants, 2183
Mucosa-associated lymphoid tissue (MALT), conjunctival lymph follicle innervation (monkey), 884
Mucus, in precorneal tear film (rat), 381
Müller cells
basic fibroblast growth factor-induced bFGF mRNA expression in (rat), 1358
tractional force generation (pig), 456
stimulation by growth factors in human vitreous, 456
Multidrug resistance, 2523
Muscarinic receptor subtypes, in iris-ciliary body, 1434
Mutational analysis
disruption of conserved cysteine in X-linked green cone opsins, 1074
RDS and *ROM1* mutations in retinitis pigmentosa, 1972
TIMP-1 gene in X-linked retinitis pigmentosa 2, 1893
Mydriasis, diagnostic, acute angle-closure glaucoma after, 2683
Myopia
adult-onset and adult-progression in occupational group, 321
corneal asphericity and, 311
late-onset, accommodative function, 1511
multifocal ERG in, 2844
prevalence and risk factors, in adult inner city population, 334
rod-mediated retinal function in children with history of mild ROP, 1175
scleral growth (chick), 1726
Myosin, fast myosin heavy chain expression in levator palpebrae and retractor bulbi muscles (rabbit), 2817

N

Natural killer (NK) cell(s), aqueous humor-mediated inhibition of activity, intraocular tumor growth and, 1277
Neovascularization
choroidal
argon laser photoocclusion of choriocapillaris for (rat), 2702
fibroblast growth factor-5 expression by choroidal microvascular endothelial cells in vitro (bovine), 2073
corneal, angiostatic drugs in (rabbit), 1954
intraocular
astroctye apoptosis and (rat), 1653
vascular endothelial growth factor in, 1647
quantification of retinal vascular proliferation in oxygen-induced retinopathy (mice), 1168
Nerve fibers, corneal nerve architecture, 985
Nerve growth factor, plasma levels, in vernal keratoconjunctivitis, 2161
Neural networks, keratoconus and keratoconus suspect detection, 2290
Neural plasticity, perceptual learning and Vernier acuity improvement in adult amblyopia, 1493
Neurotoxin, eosinophil-derived, corneal epithelial cell viability and morphology in vitro, 593
Neurotransmitters, retinal (vertebrate), 553
Neurotrophins, brain-derived neurotrophic factor, in ganglion cell axonal injury (rat), 1840
Neurovascular bundle, inferior oblique neurovascular bundle stiffness, 1314
Night blindness, X-linked congenital stationary night blindness, localization of CSNBX locus between *RP2* and *RP3* on proximal Xp, 2750
Nitric oxide
arteriolar constriction after branch retinal vein occlusion (pig), 1450
in bradykinin-induced ciliary artery relaxation (pig), 1761
enhancement of cholinergic amacrine cell activity (rabbit), 1634
light-dependent streptozotocin-induced corneal toxicity (rat), 995
neurogenic, ciliary artery smooth muscle tone (pig), 2261
nitric oxide-cGMP pathway in cholinergic and tachykinergic contraction of iris sphincter muscle (rabbit), 1719
pericyte relaxation induced by 3-morpholino-sydnonimine and atrial natriuretic peptide (bovine), 1563
release from corneal endothelial cells and keratocytes after LPS and cytokine stimulation (bovine), 2045
retinal toxicity (rabbit), 2540
Nitric oxide synthase, in retinal excitotoxicity, 2038
N-methyl-D-aspartate (NMDA) receptor antagonist, MK-801, in retinal laser injury (rat), 1380
Nociception, corneal pain reduction by antiinflammatory drugs (cat), 1944
Norepinephrine, uveal tract release, peroxides and, 842
Norrie disease, retinoschisislike alterations in Norrie disease mutant mice, 710
Nuclear factor kappa B (NFkB), dexamethasone-induced suppression of NFkB and CD18-mediated leukocyte adhesion to cultured corneal endothelial cells (bovine), 2427
Nystagmus, infantile, development, documentation via photo-oculographic and electro-oculographic eye movement recordings, 767

O

Objective cycloposition, after inferior oblique recession, 405
Oblique muscle(s)
inferior oblique neurovascular bundle stiffness, 1314
inferior oblique recession, cyclorotatory changes after, 405
Occupational myopia, 321
Ocular alignment
binocular, rectus muscle pulley paths, 227

measurement, corneal reflex techniques, limbus center vs. entrance pupil center for, 2597
Ocular-ambient exposure ratio (OAER)
measurement via polysulfone contact lenses, 1485
visible and UV-B OAER for general population, 1003
Ocular counterrolling, stability of ocular counterrolling and Listing's plane during static roll-tilts (monkey), 2103
Ocular surface epithelium
intercellular pore size and porosity, paracellular and aqueous penetration routes (rabbit), 627
Pax-6 homeobox gene expression (vertebrates), 108
Ocular surface misalignment, Purkinje-image analysis via exact ray tracing, 1476
Ontogeny, development of iris dendritic cells (rat), 2639
Ophthalmic artery, blood flow velocity, in untreated glaucoma, color Doppler imaging, 690
Ophthalmodynamometry, contact lens tonometry, 2447
Ophthalmoscopy, contact lens tonometry during, 2447
Optical coherence tomography, X-linked retinitis pigmentosa, disease expression caused by putative null mutation in *RPGR*, 1983
Optic disc, morphology, in preterm children, 1184
Optic nerve
in pseudoexfoliation syndrome, 2435
transection, peripheral nerve transplantation, retinal ganglion cell axon regeneration into Schwann-cell graft (rat), 1401
vascular endothelial growth factor in, in nonproliferative diabetic retinopathy, 36
Optic nerve atrophy, retinal ganglion cell abnormalities in *Bst/+* mice, 2112
Optic nerve injury
brain-derived neurotrophic factor mRNA expression in retinal ganglion cells (rat), 1840
retinal ganglion cell apoptosis, *bcl-x*$_L$ expression, 2545
Optic nerve response, insulin and retinal electrophysiology (cat), 792
Optic neuritis
color vision defect type and spatial vision in, 2278
in experimental allergic encephalomyelitis, superoxide dismutases in (guinea pigs), 1203
"recovered", SKILL Card testing in, 207
Optic tectum, Brn-3.0 expression (*Xenopus*), 960
Optokinetic nystagmus, monocular asymmetry, retrospective prediction of early-onset esotropia, 719
Orbicularis oculi
age-related changes in eyelid kinematics, 92
doxorubicin chemomyectomy, prevention of injection site inflammation via corticotropin-releasing factor (rabbit), 834
Orbit
extraocular muscle pulleys, innervation of extraocular pulley smooth muscle, 1774
inferior oblique neurovascular bundle stiffness, 1314
Orbitopathy, IL-1 receptor antagonist in Graves' orbital fibroblasts, 1018
Orientation, selective, infants, 2183
Orientation discrimination, modeling spatial integration and contrast variance in visual pattern discrimination, 260
Osmolality, outflow facility measurement and (bovine), 2165
Outflow facility
bumetanide inhibition of sodium-potassium-chloride cotransport and (monkey), 1700
density of pores in inner wall of Schlemm's canal and, 1517
effect of cytochalasin D, 2790
measurement, influence of storage time, aqueous humor albumin, and osmolality (bovine), 2165
phenoxyacetic acids and (animals), 1526
pressure effects on interendothelial junctions in Schlemm's canal, 2460
prostaglandin-induced matrix metalloproteinase release from ciliary smooth muscle cells, 2772
sodium-potassium-chloride cotransport in trabecular meshwork cells, dexamethasone modulation, 1229
uveoscleral, prostaglandin-induced alterations in ciliary muscle extracellular matrix and, 2214
Oxidation
carotenoids, oxidative metabolites in retina, 1802
glucose metabolism in outer retina (cat), 48
pathologic, peroxynitrite and, in experimental autoimmune uveitis (rat), 1333
Oxidative stress, retina, fluorophotometric quantitation (rabbit), 2721
Oxygen/oxygenation
glucose metabolism in outer retina (cat), 48
pericyte relaxation induced by 3-morpholino-sydnonimine and atrial natriuretic peptide (bovine), 1563
photoreceptor death/survival in retinal development (RCS rat), 1667

P

Paraneoplastic syndrome, cancer-associated retinopathy, recoverin autoantibodies and apoptotic retinal cell death in, 283
Parasympathetic nervous system, innervation of extraocular pulley smooth muscle, 1774
Parasympathetic vasodilator reflex, 2476
Paraxial ray tracing analysis, ocular alignment mesurement, limbus center vs. entrance pupil center for, 2597
Parietal lobe, visual attention processing, 364
Patch-clamp study, maxi-K-channels in trabecular meshwork cells (bovine), 1883
Pattern discrimination, modeling spatial integration and contrast variance in visual pattern discrimination, 260
Pax-6 homeobox gene, expression in ocular surface epithelia (vertebrates), 108
Pediatric ophthalmopathy
fundus morphology in preterm children, 1184
rod-mediated retinal function in children with history of mild ROP, 1175
Penetrating keratoplasty. *See also* Corneal transplantation
allograft rejection, topical FK506 in (rat), 901
suitability of organ-cultured corneas for, factors influencing, 16
Perceptual learning, Vernier acuity improvement in adult amblyopia, 1493
Perfusion pressure
choroidal blood flow and, 1752
effects on interendothelial junctions in Schlemm's canal, 2460
Pericyte(s)
in metabolic autoregulation of retinal capillary blood flow
angiotensin II-induced suppression of CO_2-induced relaxation of pericytes (bovine), 652
CO_2 effect on intracellular pH and contractility (bovine), 643
oxygen modulation of pericyte relaxation induced by 3-morpholino-sydnonimine and atrial natriuretic peptide (bovine), 1563
relaxation, adenosine-induced (bovine), 2695
Perimetry
automated, test-retest variability, use of size V stimuli and, 426
blue-on-yellow
correlation with optic disc parameters, 2452
fluorometry of crystalline lens for correcting results, 697
flicker, detection of glaucomatous visual field loss, temporal modulation perimetry vs. critical flicker frequency in, 2270
frequency-doubling, glaucomatous visual field loss, 413

refractive error and detection acuity and resolution acuity in peripheral vision, 2134
Peripheral nerve transplantation, retinal ganglion cell axon regeneration into Schwann-cell graft (rat), 1401
Peripheral vision
detection and resolution acuity, refractive error and, 2134
geometric distortions in facial features at various eccentricities, 1029
Permeability
corneal endothelium, phorbol ester modulation (rabbit), 2649
corneal epithelial permeability to fluorescein, repeatability study, 1830
paracellular and aqueous penetration routes in cornea, conjunctiva, and sclera (rabbit), 627
letter, 2177
retinal capillary endothelium, effect of high glucose (bovine), 635
serum inhibition of tight junction formation in cultured RPE cells (rat), 1082
vascular, in diabetic retinopathy, 2729
vascular hyperpermeability, ocular neovascularization and, 1647
Peroxidase, eosinophil, corneal epithelial cell viability and morphology in vitro, 593
Peroxides, uveal norepinephrine release, 842
Peroxynitrite, oxidative damage in experimental autoimmune uveitis (rat), 1333
P-glycoprotein, multidrug resistance in choroidal melanoma, 2523
pH
cytoplasmic, nonpigmented ciliary epithelium, membrane-associated carbonic anhydrase and (rabbit), 2093
retinal capillary pericytes, effect of carbon dioxide (bovine), 643
Phacoemulsification, initial complication rate in India, 2331
Phagocytosis
iris pigment epithelial cells (pig), 2255
rod outer segments, vitronectin and serum-stimulated ROS uptake by cultured RPE cells, 1588
trabecular meshwork cells, dexamethasone and, 1902
Phenoxyacetic acids, nonsulfhydryl-reactive, aqueous humor outflow facility and (animals), 1526
Phorbol ester
modulation of corneal endothelial permeability (rabbit), 2649
Na,K-ATPase response to phorbol ester in ciliary epithelium (rabbit), 866
Phosphatidylinositol 3-kinase
epidermal growth factor stimulation of, in corneal epithelial wound closure (rabbit), 1139
in rod outer segments (bovine), 1873
Phosphorylation
effect on intercellular communication in cultured RPE cells (rat), 1598
protein tyrosine phosphorylation
branch retinal vein occlusion and (cat), 972
in ischemia-reperfusion injury, genistein and (rat), 1193
Photoactivation. *See* Light exposure
Photoaffinity labeling, macular carotenoids, 167
Photodynamic therapy, argon laser photoocclusion of choriocapillaris (rat), 2702
Photokeratitis, UV-B-induced mitochondrial dysfunction and migration of viable corneal epithelial cells in vitro, 620
Photo-oculography, eye movement recordings, documentation of development of infantile nystagmus, 767
Photoreceptor(s)
cDNA for novel rod photoreceptor protein, 2576
cell death/survival, tissue oxygen levels and (RCS rat), 1667
changes in diabetic retinopathy, 2355
disc-plasma membrane fusion in rod outer segments, cell-free lysis model, 487
disruption of conserved cysteine in X-linked green cone opsins, 1074
dystrophin localization in cone cells (mice), 1627
foveal cone function in nonproliferative diabetic retinopathy and macular edema, 1443
lipid peroxidation, in experimental autoimmune uveitis (rat), 1333
neuronal coupling in rod-signal pathways of retina, 267
phosphatidylinositol 3-kinase activity in rod outer segments (bovine), 1873
photoreceptor degeneration and outer-segment dysplasia in transgenic mouse model of *RDS*-mediated dominant retinitis pigmentosa, 498
progressive rod-cone degeneration, dietary docosahexanoic acid and (dog), 2387
rod-mediated retinal function in children with history of mild ROP, 1175
rod outer segment phagocytosis, vitronectin and serum-stimulated ROS uptake by cultured RPE cells, 1588
sensitivity to mitochondrial blockade (rat), 1569
S-pathway visually evoked potential latency and blood glucose level, 800
Stiles-Crawford effect, age and, 1271
upstream silencer elements in cone transducin α-subunit (GNAT2) expression, 196
in X-linked retinitis pigmentosa, disease expression caused by putative null mutation in *RPGR*, 1983
Pituitary adenylate cyclase activating polypeptide receptor, ciliary process responsiveness during circadian cycle (rabbit), 1708
Plasticity, perceptual learning and Vernier acuity improvement in adult amblyopia, 1493
Platelet-activating factor, cyclooxygenase-2 expression in corneal epithelium (rabbit), 2492
Platelet-activating factor receptor, in eye (rat), 2672
Platelet-activating factor receptor antagonist, IFN-α-induced leukocyte entrapment in retinal microcirculation (rat), 811
Platelet-derived growth factor
human vitreous, tractional force generation by Müller cells (pig), 2053
RPE cell contraction of collagen gels, 824
tractional force generation by Müller cells (pig), 456
Polymerase chain reaction
carbonic anhydrase isozyme III expression in ciliary processes and lens, 539
cathepsin G, acid phosphatase, and α1-proteinase inhibitor mRNA levels in keratoconus corneas, 529
reverse transcriptase. *See* Reverse transcription-polymerase chain reaction
Polyol pathway, retinal, glucose and (rat), 62
Population study
acute angle-closure glaucoma after diagnostic mydriasis, 2683
adult-onset and adult-progression of myopia in occupational group, 321
comprehensive assessment of visual impairment in elderly population, 557
demographic characteristics of vision-disabled elderly, 2566
function and visual impairment in elderly population, 72
prevalence and risk factors for refractive errors in adult inner city population, 334
retrospective prediction of early-onset esotropia from components of infantile squint syndrome, 719
self-reported assessment of dry eye, 2469
visible and UVB ocular-ambient exposure ratios for general population, 1003
Potassium, sodium-potassium-chloride cotransport. *See* Membrane transport

Potassium channels, in bradykinin-induced ciliary artery relaxation (pig), 1761
POU-domain, Brn-3.0 expression (*Xenopus*), 960
Precorneal tear film, structure and composition (rat), 381
Prednisolone, IFN-α-induced leukocyte entrapment in retinal microcirculation (rat), 811
Preferential looking, forced-choice, 2183
Preferred retinal locus, dual PRLs in maculopathy, 1812
Prematurity, fundus morphology in preterm children, 1184
Presbyopia, lens changes during accommodation and, 569

insulin effect (cat), 792
polyol pathway activation (rat), 62
hemodynamics, diacylglycerol and protein kinase C-β and (rat), 2711
laser injury, neuroprotective and antiproliferative effects of MK-801 (rat), 1380
localization of Batten disease (CLN3) protein (mice), 2375
methylcobalamin and glutamate-induced neurotoxicity in cultured retinal cells (rat), 848
neural, MHC class II expression in neural retinal microglial and vascular elements in AMD, 2125
neuronal coupling in rod-signal pathways of retina, 267
neurotoxicity of nitric oxide (rabbit), 2540
neurotransmitters in (vertebrate), 553
oxidative metabolites of lutein and zeaxanthin, 1802
oxidative stress, fluorophotometric quantitation (rabbit), 2721
protein tyrosine phosphorylation, in ischemia-reperfusion injury, genistein and (rat), 1193
response to branch vein occlusion (cat), 972
stay light, wavelength dependence, 1321
ubiquitin conjugation and degradation, light exposure and (rat), 2344
ultrashort laser pulse effects (monkey), 2204
vascular development, astrocytes in (rat), 1653
vascular endothelial cells, barrier properties, 2423
vascular endothelial growth factor in, in nonproliferative diabetic retinopathy, 36
vascular patterns, prematurity and, 1184
vascular proliferation, quantifiable model, oxygen-induced retinopathy (mice), 1168

Retinal artery, central
blood flow velocity, in untreated glaucoma, color Doppler imaging, 690
relaxation, adrenomedullin-induced (dog), 56

Retinal capillary(ies)
endothelial permeability, effect of high glucose (bovine), 635
oxygen modulation of pericyte relaxation induced by 3-morpholino-sydnonimine and atrial natriuretic peptide (bovine), 1563
pericytes
CO_2-induced relaxation, angiotensin II-induced suppression (bovine), 652
effect of carbon dioxide on intracellular pH and contractility (bovine), 643

Retinal degeneration
ceroid-lipofuscinosis, 2375
clinicopathologic correlation of localized RPE debridement, hydraulic vs. abrasive debridement (cat), 1094
ischemia-reperfusion injury, genistein in (rat), 1193
photoreceptor degeneration in *Pdeg*^{rd1}/*Pdeg*^{rd1} mice, effect of antiapoptotic BCL2 gene, 943
plasma lipid levels and (dog), 2387
RPE cell tight junctions (RCS rat), 188

Retinal dystrophy, photoreceptor death, tissue oxygen levels and (RCS rat), 1667

Retinal microcirculation. *See also* Retinal capillary(ies)
IFN-α-induced leukocyte entrapment, effects of prednisolone, platelet-activating factor receptor antagonist, or superoxide dismutase (rat), 811

Retinal pigment epithelium
adeno-associated virus-mediated gene transfer (mice), 2857
aging and cell density, 2016
calcium signaling during stimulation (rat), 176
CD44 in cultured RPE cells, 2027
cis-hydroxyproline inhibition of proliferation, collagen synthesis, attachment, and migration of cultured RPE cells (bovine), 520
debridement, clinicopathologic correlation of hydraulic vs. abrasive debridement (cat), 1094
flupirtine and apoptosis in cultured RPE cells, 1390
folate transport in cultured RPE cells, 1578
5-HT_{1A} receptors negatively coupled to cAMP production in cultured RPE cells, 510
immunogenic potential of human fetal RPE cells, 2662
intercellular communication in cultured RPE cells, effect of glucose concentration and protein phosphorylation (rat), 1598
interleukin-8 secretion
dexamethasone and cyclosporin A modulation, 436
modulation by T-lymphocyte products, 446
lipofuscin content, in AMD, 478
MAP1B expression in RPE cells, 2852
monocyte chemotactic protein-1 secretion
dexamethasone and cyclosporin A modulation, 436
modulation by T-lymphocyte products, 446
platelet-derived growth factor and RPE cell contraction of collagen gels, 824
RET-PE2 surface antigen (rat), 2366
RPE cell attachment to and contraction of retina in vitro, 2064
RPE cell tight junctions (RCS rat), 188
serum inhibition of tight junction formation in cultured RPE cells (rat), 1082
transplantation
immunity and immune privilege elicited by cultured RPE cell transplants (mice), 1619
reattachement of cultured RPE cells to RPE-derived extracellular matrix and Bruch's membrane, 1110
ultrashort laser pulse effects (monkey), 2204
vitronectin and serum stimulation of ROS uptake by cultured RPE cells, 1588

Retinal transplantation
anterior chamber-associated immune deviation in, effect of cyclosporine (mice), 2152
immunogenic potential of human fetal RPE cells, 2662

Retinal vein occlusion
branch vein
nitric oxide release and arteriolar constriction after (pig), 1450
protein tyrosine phosphorylation after (cat), 972
intravascular presure and (cat), 2742

Retinitis, MHC class II expression in retina (rat), 1848

Retinitis pigmentosa
evaluation of recoverin gene for mutations in, 704
generation of transgenic mouse model of *RDS*-mediated dominant retinitis pigmentosa, 498
RDS and *ROM1* mutations in retinitis pigmentosa, 1972
sperm abnormalities in, 2619
TIMP-1 gene in X-linked retinitis pigmentosa 2, 1893
X-linked, disease expression caused by putative null mutation in *RPGR*, 1983

Retinoblastoma, cytocidal combination of carboplatin and hyperthermia (murine cell line), 2516

Retinoic acid, in retinal and eye development, 1471

Retinopathy of prematurity
neovascularization, astroctye apoptosis and (rat), 1653
quantification of oxygen-induced retinopathy (mice), 1168
rod-mediated retinal function in children with history of mild ROP, 1175

Retinoschisis, retinoschisislike alterations in Norrie disease mutant mice, 710

Retractor bulbi muscles, fast myosin heavy chain expression (rabbit), 2817
Reverse transcription-polymerase chain reaction
cytokine expression in conjunctival cells in allergic conjunctivitis, 1350
GROα expression by corneal cells exposed to proinflammatory cytokines, 1149
growth factor-receptors systems in lens epithelial cells, 1543
IL-1 receptor antagonist in Graves' orbital fibroblasts, 1018
platelet-activating factor receptor mRNA in eye (rat), 2672
retinal cell death genes (rat), 2545
viral and cytokine genes in aqueous humor, in HTLV-1 uveitis, 676
Rods. *See* Photoreceptor(s)

S

Saccades, changed metrics of repeated saccades (monkey), 2810
S-adenosylmethionine, methylcobalamin and glutamate-induced neurotoxicity in cultured retinal cells (rat), 848
Salisbury Eye Evaluation (SEE) Project
comprehensive assessment of visual impairment in elderly population, 557
function and visual impairment in elderly population, 72
Scanning laser ophthalmoscopy
fundus autofluorescence in AMD, 478
retinoschisislike alterations in Norrie disease mutant mice, 710
using two preferred retinal loci for different lighting conditions in patients with central scotomas, 1812
Scar/scarring, corneal
HSV-1-induced, HSV-1 glycoprotein K-induced exacerbation of (mice), 1213
immunoglobulin diffusion into grafted cornea and (rat), 876
Schlemm's canal
density of pores in inner wall of Schlemm's canal, 1517
pressure effects on interendothelial junctions in Schlemm's canal, 2460
Schwann cells, retinal ganglion cell axon regeneration into Schwann-cell graft (rat), 1401
Sclera
growth, modulation by visual stimulation (chick), 1726
paracellular and aqueous penetration routes (rabbit), 627
letter, 2177
proteoglycans, 1740
Scotoma, using two preferred retinal loci for different lighting conditions, 1812
Scotopic vision, infants, 2183
Secretory response, lacrimal gland, electrical stimulation of cornea and facial nerve root and (cat), 2476
Sensory nerves, conjunctival lymph follicle innervation (monkey), 884
Serotonin, 5-HT_{1A} receptors negatively coupled to cAMP production in cultured RPE cells, 510
Serum
inhibition of tight junction formation in cultured RPE cells (rat), 1082
stimulation of ROS uptake by cultured RPE cells, 1588
Sialyl Lewis X oligosaccharide, P-selectin in endotoxin-induced uveitis (rat), 1610
Signal transduction
ACAID-inducing signals after intracameral injection of antigen (mice), 2245
calcium and platelet-activating factor-induced cyclooxygenase-2 expression in corneal epithelium (rabbit), 2492
calcium signaling in RPE cells during mechanical stimulation (rat), 176
endothelin receptor-mediated calcium signaling in corneal epithelial cells (bovine), 130
epidermal growth factor stimulation of phosphatidylinositol 3-kinase in corneal epithelial wound closure (rabbit), 1139
G-protein-based, during lens cell differentiation (chick), 241
neuronal coupling in rod-signal pathways of retina, 267
VIP receptor subtypes in lacrimal gland, 610
Size constancy, in albinism, stereopsis and, 2800
SKILL card, acuity test of reduced luminance and contrast, 207
Sleep, stability of ocular counterrolling and Listing's plane during static roll-tilts (monkey), 2103
Smith-Kettlewell Institute Low Luminance Card. *See* SKILL Card
Sodium
aqueous humor flow and sodium movement from plasma to aqueous, timolol and (rabbit), 1274
sodium-potassium-chloride cotransport. *See* Membrane transport
Sodium nitroprusside, cGMP formation and muscle relaxation in ciliary muscle and iris sphincter, 2629
Sodium pump, Na,K-ATPase response to phorbol ester in ciliary epithelium, indomethacin and (rabbit), 866
Sorsby's fundus dystrophy, 817
dark adaptation in, rod plateaux during, 1786
Spatial scaling, geometric distortions in facial features at various eccentricities, 1029
Spatial vision
in elderly population, 557
in optic neuritis, 2278
SKILL Card testing, 207
Spectrophotometry, ultraviolet radiation at ocular surface, measurement via polysulfone contact lenses, 1485
Spermatozoa, fatty acid composition, in retinitis pigmentosa, 2619
Sperm motility, in retinitis pigmentosa, 2619
Spheroids, iris pigment epithelial cells (pig), 2255
Spleen, in maintenance of ACAID, 534
Squint, no more "squint" please (*letter*), 1465
Standing potential, insulin and retinal electrophysiology (cat), 792
Stay light, retinal, wavelength dependence, 1321
Stem cells, differential potential of keratinocytes, 753
Stereoacuity, in elderly population, 557
Stereopsis
functional consequences in albinism, 2800
infants, 2183
Stiffness, inferior oblique neurovascular bundle stiffness, 1314
Stiles-Crawford effect, age and, 1271
Strabismus
infantile esotropia without nystagmus, motion detection deficits, 219
prognosis for functional correction, relation to age at onset of esotropia, 719
rectus muscle pulleys in, location and stability, 227
Strabismus surgery, reattachement of extraocular muscles using fibrin glue (rabbit), 543
Strabismus sursoadductorius, cyclorotatory changes after inferior oblique recession, 405
Streptozotocin, corneal cytotoxicity, nitric oxide and light exposure in (Rat), 995
Stress protein, ubiquitin, 2344
Subjective cyclodeviation, after inferior oblique recession, 405
Subretinal membranes, 193-nm excimer laser-based microsurgical system for, 1825
Substance P
plasma levels, in vernal keratoconjunctivitis, 2161
topical, corneal epithelial wound closure and (rabbit), 388
Superior colliculus, visual attention processing, 364
Superoxide dismutase, IFN-α-induced leukocyte entrapment in retinal microcirculation (rat), 811
Support ratio, illusory figure perception, 2554
Sympathetic nervous system, innervation of extraocular pulley smooth muscle, 1774

Synaptic transmission, ciliary artery smooth muscle tone, nitroxidergic-cholinergic nerve interactions (pig), 2261
Synthetic metalloproteinase inhibitor, neutrophil activity in alkali-degraded cornea (rabbit), 1340

T

Tear film, precorneal, structure and composition (rat), 381
Tears, complement and complement regulatory proteins in, 1
Teller, Davida Y.
  Friedenwald Award, 2181
  Friedenwald Lecture, 2183
Temporal modulation perimetry, detection of glaucomatous visual field loss, 2270
Temporal vision, infants, 2183
Tessellated fundus, in myopia, 2844
Thyroid ophthalmopathy, IL-1 receptor antagonist in Graves' ophthalmopathy, 1018
Ticrynafen, aqueous humor outflow facility and (animals), 1526
Tight junctions
  astrocytes and barrier properties of retinal vascular endothelial cells (bovine), 2423
  paracellular permeability of retinal capillary endothelium (bovine), 635
  phorbol ester modulation of corneal endothelial permeability (rabbit), 2649
  pressure effects on interendothelial junctions in Schlemm's canal, 2460
  retinal ganglion cell axon regeneration into Schwann-cell graft (rat), 1401
  RPE cells from RCS rats, 188
  serum inhibition of tight junction formation in cultured RPE cells (rat), 1082
Timolol
  aqueous humor flow and sodium movement from plasma to aqueous (rabbit), 1274
  circadian effects on IOP, ciliary process β-adrenergic, VIP, and pituitary adenylate cyclase activating polypeptide receptor responsiveness and (rabbit), 1708
Tissue inhibitor of metalloproteinase-1 (TIMP-1), in X-linked retinitis pigmentosa 2, 1893
Tissue inhibitor of metalloproteinase-3 (TIMP-3)
  in age-related macular degeneration, 1060
  angiogenesis inhibition, 817
    letter, 2433
T lymphocyte(s)
  immunogenic potential of human fetal RPE cells, 2662
  secretions. *See also* Cytokines
    RPE cell IL-8 and monocyte chemotactic protein-1 secretion and gene expression, 446
TNF. *See* Tumor necrosis factor
Tonometry, contact lens tonometry, 2447
Topographic analysis
  corneal asphericity and myopia, 311
  RPE cell density and aging, 2016
Torsion, cyclorotatory changes after inferior oblique recession, 405
Trabecular meshwork
  effect of cytochalasin D, 2790
  effect of phenoxyacetic acids (animals), 1526
  fibrillin-containing microfibrils, 970
  growth effect of VIP in situ, 2781
  hyaluronan in, 1222
  phagocytosis, dexamethasone and, 1902
  physiology, bumetanide inhibition of sodium-potassium-chloride cotransport and (monkey), 1700
  smooth muscle-like properties, maxi-K-channels and their activation by cGMP (bovine), 1883
  sodium-potassium-chloride cotransport, dexamethasone modulation, 1229
  volume variation, outflow facility measurement and (bovine), 2165
Tracer-coupling technique, neuronal coupling in rod-signal pathways of retina, 267
Transducin, upstream silencer elements in cone transducin α-subunit (GNAT2) expression, 196
Transforming growth factor-β
  for bleb leaks (rabbit), 1630
  platelet-derived growth factor and RPE cell contraction of collagen gels, 824
Transforming growth factor β-1, in endotoxin-induced uveitis (mice), 257
Transforming growth factor-β receptor, expression in human cornea, 1922
Transgenic mice
  electrophysiology and density of retinal neurons in *Krd* mice, 919
  generation of transgenic mouse model of *RDS*-mediated dominant retinitis pigmentosa, 498
  photoreceptor degeneration in $Pdeg^{rm1}/Pdeg^{rm1}$ mice, effect of antiapoptotic BCL2 gene, 943
  type II collagen in developing eye of del1 mice, 930
Transplantation
  corneal. *See* Corneal transplantation; Penetrating keratoplasty
  retinal pigment epithelium
    immunity and immune privilege elicited by cultured RPE cell transplants (mice), 1619
    reattachement of cultured RPE cells to RPE-derived extracellular matrix and Bruch's membrane, 1110
Trauma, penetrating corneal injury, macrophage migration inhibitory factor expression in (rat), 1555
Tubulin, retinal, carotenoid-binding protein, 167
Tumor(s), anterior segment, aqueous humor-mediated inhibition of natural killer cell activity and, 1277
Tumor necrosis factor (TNF), TNF-α
  GROα expression by corneal cells exposed to, 1149
  RPE cell chemokine secretion, dexamethasone and cyclosporin A modulation, 436
Tumor necrosis factor (TNF) receptor, in HSV-infected eyes (mice), 9
Tyrosine, phosphorylation. *See* Phosphorylation, protein tyrosine phosphorylation

U

Ubiquitin, conjugation and degradation in retina, light exposure and (rat), 2344
Ultraviolet radiation
  absorption spectra of corneas in far ultraviolet region, 1283
  cytokine production by corneal cells, 2483
  measurement at ocular surface, polysulfone contact lenses for, 1485
  UV-B-induced mitochondrial dysfunction and migration of viable corneal epithelial cells in vitro, 620
UV-B ocular-ambient exposure ratios for general population, 1003
Upstream silencer elements, in cone transducin α-subunit (GNAT2) expression, 196
Usher syndrome, evaluation of recoverin gene for mutations in, 704
Uveal tract
  melanoma
    HLA class I antigen expression, 1865
    ruthenium plaque brachytherapy, histologic study, 2081
  norepinephrine release, peroxides and, 842
  TNF receptor mRNA in (mice), 9
Uveitis

endotoxin-induced
P-selectin in (rat), 1610
transforming growth factor β-1 in (mice), 257
experimental autoimmune anterior uveitis, induction via immunization with bovine melatonin-associated antigen without adjuvant (rat), 2171
experimental autoimmune uveitis, peroxynitrite and oxidative damage in (rat), 1333
HTLV-I, lymphocytic infiltration of aqueous humor, immunologic and virologic characterization, 676
tumor necrosis factor in HSV-infected eyes (mice), 9

V

Vascular cell adhesion molecule-1 (VCAM-1), in lens epithelial cells of human cataracts, 579
Vascular endothelial growth factor
in diabetic retinopathy, 2729
in ocular neovascularization, 1647
in retina and optic nerve, in nonproliferative diabetic retinopathy, 36
retinal, branch retinal vein occlusion and (cat), 972
Vasoactive intestinal peptide
ciliary process responsiveness during circadian cycle (rabbit), 1708
growth effect on trabecular meshwork cells in situ, 2781
in lacrimal gland secretion, G_s and $G_{q/11}$ and (rabbit), 1261
Vasoactive intestinal peptide (VIP) receptor, in lacrimal gland, 610
Vasodilation, lacrimal gland, electrical stimulation of cornea and facial nerve root and (cat), 2476
Vernal keratoconjunctivitis
effects of eosinophil granule proteins on corneal epithelial cell viability and morphology, 593
plasma substance P levels in, 2161
Vernier acuity
improvement, in adult amblyopia, 1493
infants, 2183
Videokeratography, keratoconus and keratoconus suspect detection, neural network approach vs., 2290
Videokeratoscopy, corneal topography and myopia, 311
Virulence, corneal, *Pseudomonas aeruginosa*, protease IV and (animals), 1535
Visible light, ocular-ambient exposure ratios for general population, 1003
Visual acuity
in elderly population, 557
function and visual impairment in elderly population, 72
in optic neuritis, 2278
Visual evoked potentials
blood glucose effects on chromatic visually evoked potentials, 800
retinal toxicity of nitric oxide (rabbit), 2540
Visual fields
central visual field sensitivity, macular function impairment in AMD, 469
in elderly population, 557
loss, in glaucoma
flicker perimetry in, 2270
screening via frequency-doubling perimetry, 413
testing. *See* Perimetry
Visual pathways, visual attention processing, subcortical vs. cortical influences, 364
Visual pigments
disruption of conserved cysteine in X-linked green cone opsins, 1074
variation in size of red and green visual pigment gene array, 1040
Visual stimulation, scleral growth (chick), 1726
Vitamin A, in retinal and eye development, 1471
Vitamin A deficiency, dark adaptation in, rod plateaux during, 1786
Vitamin B_{12}, methylcobalamin and glutamate-induced neurotoxicity in cultured retinal cells (rat), 848
Vitreous, growth factors, tractional force generation by Müller cells (pig), 2053
Vitreous chamber, elongation, adult-onset and adult-progression of myopia in occupational group, 321
Vitronectin, in serum-stimulated ROS uptake by cultured RPE cells, 1588

W

Wound healing
antiproliferatives and fibroblast wound healing behavior after glaucoma filtration surgery, 1998
apoptosis of lens epithelial cells after lens extraction (rabbit), 2322
connexin expression and cell communication in healing corneal epithelium (rabbit), 600
corneal epithelial wound closure
epidermal growth factor stimulation of phosphatidylinositol 3-kinase (rabbit), 1139
topical substance P and (rabbit), 388
βig in corneal wound healing, 893
macrophage migration inhibitory factor expression in penetrating corneal injury (rat), 1555
repair phenotype in corneal fibroblasts controlled by IL-1α autocrine feedback loop, 1367

X

Xenopus
Brn-3.0 expression, 960
extralenticular expression of crystallin genes, 2764
Xenotransplantation, corneal neovascularization induced by (rat), 274
X-linked retinitis pigmentosa
disease expression caused by putative null mutation in *RPGR*, 1983
TIMP-1 gene in X-linked retinitis pigmentosa 2, 1893

Z

Zeaxanthin
dietary intake, macular pigment density and, 1795
macular, binding by retinal tubulin (bovine), 167
oxidative metabolites, in retina, 1802
